

Treasury Department
March 27th 1806.

Sir

I have the honor to enclose a copy of an Act passed at the present Session of Congress, authorizing the erection of a Light House on Wood Island or on Fletcher's-neck, in the District of Maine and State of Massachusetts; and appropriating five thousand Dollars therefor: provided that sufficient Land for the accommodation of the same can be obtained at a reasonable price, and the jurisdiction vested in the United States. I have therefore to request your aid in effecting the necessary arrangements preparatory to inviting proposals for a Contract.

You will be pleased to cause an examination to be made at both the places mentioned, and the most suitable Site for a Light House fixed on, designating by proper notes and bounds, as much ground as may be necessary for the accommodation of the establishment.

The great consideration in fixing on the Site is the visibility of a Light House. This will depend upon its projection towards the Sea, and its elevation above the Surface of the water; but the firmness of the ground, and freedom from quick
Sands

Lands are matters of consequence also. Great care must therefore be used in making the examination and reporting every particular of the nature of the elevation, accessibility of the place, and generally; the local advantages and disadvantages of the situation.

If the ground belongs to the State, there will be no difficulty in obtaining a Cession of the Soil, as well as jurisdiction; but if private property, then measures must be taken for ascertaining the price for which a sufficient quantity can be purchased, unless the proprietor from considerations of public Spirit, or a desire to promote and facilitate such important improvements as have a tendency to enhance the value of his remaining Land, should be induced to give it gratis, instances of which are not unfrequent.

The foregoing information being obtained, it will be proper in forming a plan of the Building, and deciding on the materials of which the same ought to be built, to have it understood what elevation the Light should have, so that no expense may be incurred in raising it unnecessarily.

As soon as you are in possession of the necessary information on the Subject, be pleased to communicate it immediately with

with your opinion of the plan &c@, which may
be deemed most advantageous.

I have the honor to be
Respectfully
your Obed^t Serv^t

Albert Gallatin

Benjamin Lincoln Esq
Superintendent of Light Houses
Boston
