Hon.ble Henry Dearborn Esq.r Beverly August 8th 1811.

Sir.

When I conversed with You last respec=ting the Pier on the Lobster rock in our Harbor, You thect it unnecpary to have a spar with a Beacon on it, (say similar to there on the Nav.l Rendezvous) In Mr. Galushas Contract, there is to be a hole in the Capstone, & a step stone, and it would be pleasing to many here, if the funds will allow, and You approve of it, to have a Beacon. — the ringbolts I understood You wished one to have put in, I think one or two Gundalow load of Rocks placed round the pier after it is built, would answer a very good purpose. Mr. G has been at work some time, and now has the foundation laid, and his rocks in readiness, therefore I wish You to write me on the Above subjects, Afoon as Convenient, and You will Oblidge Your Very Humble Servant
