U. S. Cutter Vigilant

New York Aug 6 1880

Sir

Agreeably to your instructions I have visited all the Light Houses in the District and have attended to the necessary repairs supplied them with all the Articles for keeping their establishments in good Lighting condition and report them all in good repair with the exceptions of the Walls at Watch Hill — Poplar Point Wickford — and Warwick Neck. which have been reported heretofore. and I do not think the Buildings in any immediate danger.

The buoys have been reset in their proper places and now are in fine Order. also the Stakes in Providence River channels all have been examined and set in their proper sites and agreeable to your instructions.

The Beacons are now in good order and condition for the season.

The Dolphins in Providence River are being reset and from recent appearances will be finished in course of this Month all of which is respectfully

over
