Treasury Department
5th Auditor's Office
June 12th 1845.

Sir:

I received this morning your letter of the 9th inst. relative to an examination of Minots Ledge, with the view to erect a Lighthouse on it, and to a report and estimate of the cost of such a building.

When I spoke to you upon this subject, I supposed you would have in the course of the summer, leisure to examine these rocks, and to give me a drawing of them with the best site for the Light-house marked on them, at a very moderate charge. It would be sufficient for my present purpose to posses a drawing of the rocks, with the one noted which would best suit for the building, and this, I was under an impression, by going in the Cutter, you could furnish me with in a few days, at a cost of not exceeding 40 or 50 dollars. The plan of that for the Whales Back with some variation, which could be determined on hereafter, I have no doubt would answer perfectly well for Minots Rocks. My funds, if I were so

State Library of Massachusetts

disposed, would not allow me to pay as high as you demand for this service.

If you could run out in the Cutter, and furnish me with a rough drawing of those Rocks with the most eligible site for the building marked on it, which I think would not occupy you more than four or five days, I should be glad you would do so.

As to an examination of the Londoner, I must postpone it.

I have the honor to be,
Respectfully Sir
Your ob dt. Servt.
S. Thurston
