Oct. 13. 1884

From Engineer Secretary Major O. M. Poe.

Sir: Enclosed is transmitted a copy of a letter dated 11 Oct. '84 from the Inspector of the 1st Light House District, with reference to placing a derrick at Saddle Back Light-station, Maine.

The Board authorizes you to build this derrick as was proposed by you in your letter of 25 Sept. '84, except that the work of drilling the hole in the ledge will be done by the keepers, under the direction of the Inspector.

You are requested to furnish the keepers with the necessary tools for this purpose, and if more convenient, you may deliver the tools to the Inspector to be

The Board authorizes you to build this derrick as was proposed by you in your letter of 25 Sept. '84, except that the work of drilling the hole in the ledge will be done by the keepers, under the direction of the Inspector.

You are requested to furnish the keepers with the necessary tools for this purpose, and if more convenient, you may deliver the tools to the Inspector to be taken to the station by the tender Iris.

It is expected that the work of placing the derrick can be done by the crew of the tender Myrtle.
