1887.
Jany 5 From Engineer Secretary Major D. P. Heap U.S.A.

Sir:— Referring to the state in your estimate of funds required for the next six months, for various repairs to the tower at Moose Peak Light Station, Me., I have to say that there is a special appropriation of $10.000.— for rebuilding this tower, the Board considers it applicable to putting the tower in serviceable condition.

You are, therefore, requested to submit a statement as to all the additions and changes you consider it advisable to make in this tower, and to take into consideration

1887. the question of whether it would not be good economy and a benefit to the service if the old lantern were replaced by a new one of modern design.

The third order lantern used at Sanibel Island, is the latest type.
