OFFICE OF INSPECTOR, 10TH DISTRICT
ROOM 304, FEDERAL BUILDING
BUFFALO, N. Y.

Form 150
8/19/14

August 13, 1914.

Commissioner of Lighthouses;

Replying to Bureau endorsement dated August 7, 1914; the following is detailed estimate of cost of uncompleted items for Buffalo Breakwater North End Light Station, N.Y.

Laying engine room floor	$80.00
Oil Vapor Outfit (in stock at Buffalo Depot)	130.00
Installing illuminating apparatus: Materials. . . . . $40. Labor. . . . . 60.	100.00
Installing steel shutter and door fasteners,	35.00
Total	$345.00
- - - - -	
The exact available balance is.	$430.48
Deducting additional allotment for lens pedestal, requested by 3d Inspector,	225.00
Available balance, ...	$205.48

This balance will be just sufficient to pay for the oil vapor outfit and installation of illuminating apparatus. The other items will have to be postponed and cost defrayed from General Expenses. The 3d-order lens at present in service at Buffalo Main Light is to be used and the special appropriation is therefore not to be charged with its cost. If the oil vapor outfit now in stock could be issued without

225

transferring the cost from the special appropriation, there would be a small balance available for contingencies.
