

MATERIAL LANDED BY LIGHT TENDER

THREE LIGHT STRUCTURES
BEING BUILT AT CHAR-
LOTTE HARBOR

Tender Ivy, of the Coast Guard Lighthouse division, which left Saturday night for Charlotte Harbor with material for the erection of three light structures in the waters in that vicinity, returned to port yesterday morning.

At South Boca Grande Channel the structural parts were unloaded and delivered to the Powell Company, of Fort Lauderdale, which secured the contract for the construction of the light structures and was there with the equipment and ready to start the work.

Shortly after arrival here advices received at headquarters were to the effect that the lighted buoy at the entrance to the main ship channel in Key West harbor was extinguished and the Ivy was despatched to put the buoy in order.

Radiotelephone messages received at headquarters this morning were to the effect that the Zinnia is lying at Tavernier, awaiting weather which will permit activities at Hens and Chickens reef, where the light is to be relighted or a new lantern installed if installation is found to be necessary.
