DESCRIBE THE PRESENT AND ORIGINAL *(if known)* PHYSICAL APPEARANCE

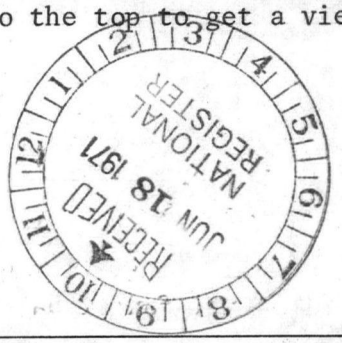

The present Fairport lighthouse is a handsomely-proportioned Berea sandstone block structure in the form of a truncated cone. It is built on a foundation which consists of pilings driven flush with the bottom of an excavation 11'-4" deep. Their upper part is encased in a foot of concrete. On top of this pile-supported slab is a grillage of two courses of 12-inch timber. On top of that is the foundation limestone, which extends to the surface of the ground. Forty-five courses of sandstone blocks comprise the main part of the tower. A spiral staircase of 69 steps is built into the brick linings. A lens room and observation platform are built above this, and the roof is topped with a copper dome. A fixed white light of the third order (same as the light in the 1825 tower) was placed in the tower. It shone at a height of 102-1/4 feet above lake level and could be seen 18-1/2 statute miles. The tower was connected by a covered way with the keeper's dwelling.

The keeper's dwelling is a 1-1/2 story brick building with gable roof and 5-bay facade. The 2-story entrance bay, in the center, is thrust out from the plane of the facade, breaking the cornice to form a wall dormer. There is an interior chimney at each gable end. All openings are segmental-arched. The interior arrangement consists of a central hall with two rooms to a side on the first floor, and a hall with one room to a side on the upper level.

To the left (west) of the downstairs hallway is a large room which was made by removing the wall which separated the original parlor and dining room. The two fireplaces are still standing. In the middle of the west wall a doorway has been cut. This leads to the pilot house addition, built in 1967 and originally part of the Great Lakes carrier Str. Frontenac. It is equipped accordingly.

To the right of the hallway on the first floor is a room which now contains the original third-order lens from Fairport lighthouse. This room was originally known as the "oil room," in which the keeper kept his supplies for servicing the lanterns for the tower. This room also contained a door which led directly to the tower, through a covered passageway. This passageway had been removed and the doorway bricked over before the Fairport Harbor Historical Society had access to the premises.

The "kitchen" display room is located north of the lens room and contains, among other exhibits, a large authentic scale model of a modern Great Lakes freighter. Entry to the museum is made through a door in this room leading from an enclosed back porch. The office and registration desk are located on this rehabilitated porch. The lighthouse itself is the main attraction of the museum, and visitors are encouraged to walk to the top to get a view of the surrounding area.

STATEMENT OF SIGNIFICANCE

Fairport Marine Museum, which consists of the present lighthouse and the adjacent keeper's dwelling, is located on a hill overlooking the mouth of the Grand River and Lake Erie. Both structures were erected in 1871 to replace the original brick lighthouse and frame dwelling built in 1825 and designed by Jonathan Goldsmith, well-known early Western Reserve architect.

For one hundred years, from 1825 to 1925, the third-order light guided mariners on Lake Erie to an easy-access harbor at Fairport Harbor, Ohio. This year, 1971, the 1871 lighthouse, which was decommissioned in 1925, is 100 years old and stands as a silent but revered symbol of a colorful past era of Great Lakes shipping. It is impossible to separate its significance from that of the port it served.

Briefly stated, it was an important gateway to Ohio's Connecticut Western Reserve when new settlers from the East were arriving by water by way of Buffalo, New York. Fairport also served as a fueling station and supply harbor for the early immigrant passenger ships and freighters bound from Buffalo to the upper Great Lakes ports. In contrast to the modern self-unloaders with their cargoes of limestone and sand and gravel that enter the harbor now, colorful brigantines, schooners and wood-burning steamboats anchored in the shelter of the harbor in its early days, guided there by the Fairport beacon.

The lighthouse also served as guardian of one of the northern terminals of the "Underground Railroad" before the Civil War.

Fairport Marine Museum, which occupies this former Fairport Harbor Coast Guard Light Station Reservation, is the first and only Great Lakes lighthouse marine museum in the United States. It was founded in 1945 by the Fairport Harbor Historical Society specifically for the purpose of preserving the lighthouse and historic traditions and sentiment of Fairport and all the Great Lakes region. Dedication took place of July 12, 1946. Title to the property was transferred by the U.S. government to the Village of Fairport in June, 1953 under a conditional deed relative to the use of the property for historical purposes. The Village leases the property to the Historical Society for $1.00 per year.

The lighthouse is important historically and as a fine enginerring achievement, functional in its design, yet esthetically quite pleasing.

12. STATE LIAISON OFFICER CERTIFICATION

As the designated State Liaison Officer for the National Historic Preservation Act of 1966 (Public Law 89-665), I hereby nominate this property for inclusion in the National Register and certify that it has been evaluated according to the criteria and procedures set forth by the National Park Service. The recommended level of significance of this nomination is:

National ☐ State ☐ Local ☒

Name Daniel R. Porter

Title Ohio Liaison Officer

Date 11 June 1971

NATIONAL REGISTER VERIFICATION

I hereby certify that this property is included in the National Register.

Dr. William J. Murtagh, Keeper
National Register
Office of Archaeology and Historic Preservation
801 - 19th Street, N.W.
Washington, D.C. 20006

Dear Dr. Murtagh:

I am pleased to transmit herewith eleven (11) completed applications for the National Register of Historic Places.

This is to certify that the Ohio Historic Site Preservation Advisory Board meeting May 14, 1971 approved the subject applications for submission to the National Register upon the recommendation of the Board's historical consultant, William G. Keener, and architectural historian, Miss Judith Kitchen.

You will note that we are making an effort to submit National Register applications for HABS structures per the request of the National Register.

Of the enclosed nominations, one only is immediately in jeopardy from a public works program. The Thompson House in Columbiana County is on a possible alternate alignment for relocated St. Rt. 7 in East Liverpool, an Ohio Department of Highways project utilizing federal highway funds.

Sincerely,

Daniel R. Porter
Director

DRP/eg

Mr. Daniel R. Porter
Director
The Ohio Historical Society
Columbus, Ohio 43210

Dear Mr. Porter:

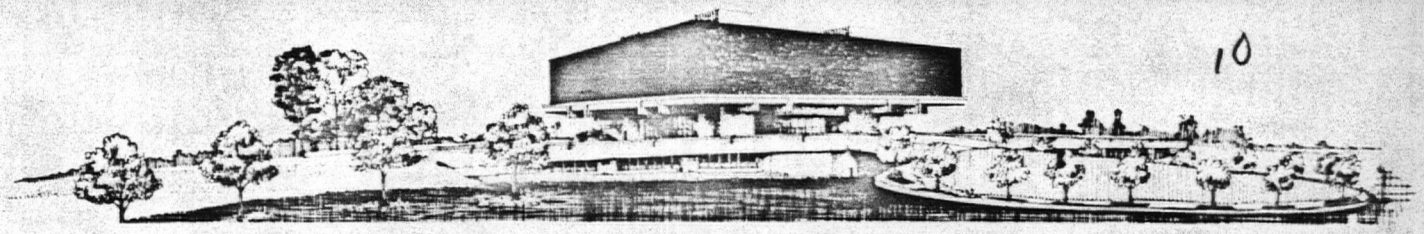

Thank you for your recent letter which listed the Congressional Districts of 11 applications for the National Register which were submitted to our office on June 11. As you know, it is a great help to us to have the District handy and not have to check the Congressional Directory when it comes time for typing the Congressional letters of notification.

Sincerely yours,

William J. Murtagh
