Boston Lighthouse Octr 30: 1807

Hon.d Sir

I am sorrey to inform you, that the late storm has taken away some of the large stones of the foundation of the south wharf, which since has undermined the Aspen work, so that a great part of two of the bays, has nearly sifted through by the sea's making a course through the place; and I think if it is not taken in hand that it may be attended with serious consequences -

I am with Respect
your most Ob.d hum.e Serv.t
Thos Knox

P.S the cracks on the eastern side of the Lighthouse continues to grow larger -

Hon.ble Benjamin Lincoln Esq.r
Superintendent of Lighthouses
