My dear Miss Boyle:

Receipt is acknowledged of your letter advising Coast Guard Headquarters of the death of your brother, Thomas Boyle, Machinist's Mate, first class, United States Coast Guard, Retired, on 20 February 1954.

It is requested that a certified copy of the certificate of death be forwarded for our records.

At the time of death there was due the estate of your brother final retired pay. This retired pay ceases at death and there is no law providing for the continued payment of any part thereof to surviving dependents. The forms necessary to effect settlement of the final pay are herewith enclosed.

If there will be no legal representative to administer the estate of your brother, the next of kin, or the person who paid, or will pay the funeral expenses should execute the enclosed Forms No. 1055, claim for the final pay, in the presence of two witnesses, taking care to answer all questions as checked. If a representative is appointed, a copy of the Court Order showing the appointment should be attached to Forms No. 1055. If the funeral expenses have been paid, a bill receipted by the undertaker should be forwarded, otherwise, the undertaker should sign the enclosed waiver form. This information is necessary to support the claim for the final retired pay.

In the event you have in your possession any uncashed retired pay checks, these should be returned to Coast Guard Headquarters for settlement with the claim for retired pay due on date of death.

Veterans Administration Form No. 530 is enclosed for making application for the burial allowance.

When the enclosed forms have been completed, return them to Coast Guard Headquarters in the enclosed pre-addressed envelope which requires no postage.

ACTION OF PHYSICAL EVALUATION BOARD

FINDINGS: Thomas Boyle, machinist's mate, first class, USCG, is unfit to perform the duties of his rating by reason of (002-xCx) Mixed psychoneurosis, (240-712) Osteoarthritis, (143-600.4) Cicatrix of skin of buttock due to trauma, and (x80-190.0) Otitis media, non-suppurative, chronic, which were incurred while entitled to receive basic pay; and (240-526) Arthritis of knee due to simple fracture, which was aggravated while entitled to receive basic pay. The precise degree of pre-service connected arthritis of knee due to simple fracture cannot be determined.

That each disability is not due to the intentional misconduct or wilful neglect of Boyle, and was not incurred during a period of unauthorized absence of while Boyle was under sentence of a court martial.

That such combined disabilities are considered to be 60% disabling in accordance with the current Veterans Administration Schedule for Rating Disabilities, computed as follows:

(a) 9106 - Psychoneurosis, mixed types, rated as
9101 Neurasthenia, moderately severe - 30%

(b) 5010 - Arthritis, due to direct trauma, rated as
5261 Leg, limitation of flexion of - Flexion limited at 150° - 20%
(NOTE: In rating this disability, the board took cognizance of paragraphs 4 and 22 on pp. 2 and 7 of the Veterans Administration Schedule for Rating Disabilities, quoted and interpreted on pp.13-15 of Law Bulletin No.180, FEB. 1951.)

(c) 5003 - Arthritis, hypertrophic, "with x-ray evidence of involvement of two or more major joints, or two or more minor joint groups, with occasional incapacitating exacerbations" - 20%

(d) 7804 - Scars, superficial; tender and painful on objective demonstration - 10%

(e) 6201 - Otitis media, catarrhal, chronic, rated as
Hearing in one ear 10 feet,
[redacted] in the other ear, hearing at 20 feet - 0%

(f) 7524 - Hydrocele - 0%

That Boyle has completed 23 years, 9 months and 14 days of active service.

That accepted medical principles indicate that disabilities (a), (b), (c), and (e) above are of a permanent nature, and that (d) and (f) may be of a permanent nature.

1. The Coast Guard Physical Evaluation Board convened in your case found that you are unfit to perform the duties of your rating by reason of permanent physical disability amounting to 60 per centum.

2. On 29 June, 1951 the Secretary of the Treasury approved the proceedings and findings of the Board and directed that you be placed on the permanent disability retired list of the United States Coast Guard effective 1 July, 1951 in accordance with Section 402 of the Career Compensation Act of 1949. You are, therefore, retired for permanent disability and your retired pay will commence on 1 July, 1951.

3. You will immediately notify the Commandant (PA) of your mailing address and you will thereafter notify the Commandant (PA) of any change in that address.

4. In the event you desire to obtain medical relief from the Public Health Service for your dependents after retirement, return Form 2533 properly executed in duplicate to the Commandant (PM) Signatures of children, twelve years of age or under, will not be required.

5. Travel expenses incident to the execution of this order are chargeable to Headquarters allotment No. 99-10, under the authorization number indicated above. Transportation of dependents and shipment of household effects to your home of selection will be provided at Government expense only if completed within one year from date of retirement or one year after the official termination of war, whichever is later. Once you have notified the Commandant of arrival at your permanent home action is final and no further designation may be made.

6. Your commanding officer will immediately furnish a copy of this order to the certifying officer having custody of your pay record. The certifying officer will transmit the pay record information to the Commandant (PA) in accordance with existing directives after final credit entries, such as leave retions, unused leave to be settled for on retirement, etc., have been posted.

RECORD OF PROCEEDINGS IN REVISION

of a

COAST GUARD PHYSICAL EVALUATION BOARD

convened at

U. S. MARINE HOSPITAL, BALTIMORE, MD.,

Case of:

BOYIE, Thomas (221-052) MM1,

U. S. Coast Guard

**
*

20 April, 1951
PH

From: Commandant
To: President, Physical Evaluation Board, Office of Commander, Fifth Coast Guard District

Subj: BOYLE, Thomas (221-052) MM, Physical Evaluation Board in case of; returned for correction and additional testimony

1. Subject-named man appeared before a Physical Evaluation Board convened at Baltimore, Maryland, 15 March 1951. The record of proceedings has been reviewed and before final action can be taken on this case the record must be corrected and testimony introduced to support the findings of the Physical Evaluation Board.

2. Review of the Board of Medical Survey and of the Physical Evaluation Board reveals that subject-named man has suffered from frequent headaches, colds, and epistaxis as well as "sinus infection with some tenderness and post nasal drip" for about eight or ten years. X-ray examination confirmed the existence of sinus pathology. In addition the Board of Medical Survey convened on 21 May, 1945, contains the diagnosis of sinusitis, purulent, chronic. From the aforementioned information it appears that a diagnosis of chronic sinusitis may well have been made by the Physical Evaluation Board and appropriate disability allowance made therefor.

3. Both Boards of Medical Survey and the proceedings of the Physical Evaluation Board indicate that subject-named man incurred injuries to the left forearm, left femur, left patella and left leg in 1916, approximately ten years prior to entrance to the lighthouse service. Moreover, there is indication in each of these records that the disability of limitation of motion of the left leg was present for several years prior to entrance into government service and that there has been no aggravation of this disability while in such service.

4. While the Physical Evaluation Board amply substantiates the presence of osteoarthritis of the left shoulder there is no indication of arthritic involvement of this nature in any joints other than the aforementioned traumatised joints. It is not apparent to the Physical Review Council whether the involvement of these injured joints constitutes traumatic arthritis or osteoarthritis. In addition it is to be noted that while "some atrophy is noted" there is presented no further information upon which may be based an evaluation of this abnormality of the left leg.

A(1)

5. While the circumcoccygeal scars may well be only temporarily tender and infected, there is no indication that such is the case.

6. You are directed to reconvene the Physical Evaluation Board for reconsideration of this case to correct the deficiencies noted in paragraphs 2, 3, 4, and 5 above.

7. The record of proceedings and supporting papers are inclosed herewith. Upon completion of the reconsideration, return the enclosures to Commandant (P).

8. It should be noted that, at the reconvened hearing, subject-named man should be present and that articles 203 and 229 of the regulations pertaining to retirement and separation for physical disability are applicable.

Via: Medical Officer in Charge, U. S. Marine Hospital, Baltimore, Md.

Subj: BOYLE, Thomas (221-052) MM1 USCG; reexamination of

1. Coast Guard Headquarters has found it necessary to return the record of proceedings in the above-captioned case for correction and additional testimony. The deficiencies found are listed in paragraphs 2, 3, 4, and 5 of the Headquarters' letter which is prefixed to the inclosed record as "A(1)" and "A(2)."

2. Proceedings in revision will accordingly be had at 1:30 p.m., 17 May 1951, at the U. S. Marine Hospital, Baltimore, Md. You will make a careful reexamination into the past and present physical and mental condition of BOYLE and be prepared to testify as to the questions raised by Headquarters' (PM) letter 20 April 1951. The record of this case to date is inclosed as matter transmitted from the files and records of Coast Guard Headquarters.

3. To enable you to make the personal reexamination, BOYLE is being directed to report to you at 1 p.m., 10 May 1951.

COAST GUARD PHYSICAL EVALUATION BOARD

U.S. Marine Hospital

Baltimore, Maryland, 17 May 1951

From: Senior Surgeon Charles G. Spicknall, and Assistant Surgeon (Reserve) Frank London, U.S. Public Health Service
To: President, Coast Guard Physical Evaluation Board

Subj: Re-examination of Boyle, Thomas (221-052) MM1, U.S. Coast Guard

1. Reference is made to Headquarters letter of 20 April 1951, concerning the above named man.

2. Re-examination of the nose shows minimal anterior septal deviation. There is no obstruction to breathing present and no polyps nor discharge noted. The mucous membrane of the nose appears normal. The paranasal sinuses are clear on X-ray taken on 10 May 1951. Examinations of the nose at this hospital on 15 November 1950 and 9 March 1951, have also been negative. X-ray of the sinuses on 11 November 1950 showed slight haziness of the antra with the walls somewhat thickened. Not infrequently such minor X-ray changes are seen without sinusitis being present. Our examinations have not shown any evidence of sinusitis and it is our opinion that no disability allowance for this disease is justified.

3. While the limitation of motion of the left leg existed prior to Boyle's entry into government service, this man had more pain in the left knee after he slipped on the ice at the Washington Radio Station about two years ago. It is our opinion that his disability in the left knee has been aggravated by government service.

4. Further X-rays of Boyle's joints demonstrate osteoarthritis in the cervical and dorsal spine and right knee. While it is true that the joints of the fractured extremities may be affected by traumatic arthritis, it is our opinion that Boyle has generalized osteoarthritis which affects the traumatized joints as well as the joints not involved in the old fractures. Measurements of the lower extremities are as follows:

10 cm. above upper border of right patella - - - - 42½ cm.
10 cm. above upper border of left patella - - - - 40½ cm.
20 cm. below upper border of right patella - - - - 37 cm.
20 cm. below upper border of left patella - - - - 34½ cm.

There is some weakness of the flexor and extensor muscles of the left leg. It is our opinion that the muscle injuries of the left leg were sustained prior to Boyle's entry into government service and were not aggravated by such service.

1 (1)

5. The scars on the intergluteal fold and gluteal region are still slightly tender on re-examination. Accordingly, the following diagnosis should be added to the previous diagnosis: (143-400.4) Cicatrix of skin of buttock due to trauma.

It is our opinion that this disability was incurred while Boyle was entitled to receive basic pay and is considered to be the proximate result of performance of active duty. It is our opinion further that this disability was not due to the intentional misconduct or willful neglect of Boyle and was not incurred during a period of unauthorized absence of Boyle or while Boyle was under sentence of a court martial. The disability is considered to be not of a permanent nature, but may be of a permanent nature.

The following rating in accordance with the Current Veterans Administration Schedule for Rating Disabilities should be combined with the previously assigned ratings:

7804 Scars, superficial,
Tender and painful on objective demonstration..... 10 %

George C. Fleming,
Lieutenant, USCG,
Recorder.

1(2)

U. S. Marine Hospital,
Baltimore, Md., 17 May 1951.

The board reconvened at 1:45 p.m., pursuant to a request hereto prefixed marked "A", which was read by the recorder.

Present:

Captain Rutherford B. Lank, Jr., U. S. Coast Guard, president;
Commander Clifford S. Gerde, U. S. Coast Guard, member;
Lieutenant George C. Fleming, U. S. Coast Guard, member and recorder;
Commander Charles G. Spicknall, U. S. Public Health Service, member;
Lieutenant (junior grade) Frank London, U. S. Public Health Service Reserve, member;
George R. Tullis, chief yeoman, U. S. Coast Guard, reporter;
Thomas Boyle, machinist's mate, first class, U. S. Coast Guard, the individual whose physical fitness is being evaluated;
Commander William B. Dawson, U. S. Coast Guard, counsel for the individual concerned.

The board decided to sit with open doors.

The board reviewed the evidence in the record to date.

The medical members stated that they desired to submit a report, in writing, to supplement and explain their previous report and testimony. This supplemental report was accordingly sworn to by them, read, and appended marked "1(1)" and "1(2)."

Commander Charles G. Spicknall, U. S. Public Health Service, was called as a witness. He was warned that the oath previously taken in this case was still binding.

Examined by the recorder:

1. Q. Doctor, paragraph 2 of Headquarters' letter of 20 April 1951 (PM) refers to a history of sinusitis, purulent, chronic. Was there any evidence in recent examinations supporting such a diagnosis?

A. There was no evidence in recent examinations supporting a diagnosis of sinusitis. Examinations of the nose at this hospital on 15 November 1950 and 9 March 1951 have not demonstrated any evidence of discharge, polyps, or other abnormality of the mucous membrane of the nose. X-ray of the sinuses

on 11 November 1950 showed slight haziness of the antra with the walls somewhat thickened. Such minor x-ray changes are seen not infrequently without actual sinus infection being present. X-ray of the sinuses on 10 May 1951 showed these structures to be clear. It is my opinion that this patient has not shown any evidence of sinusitis on any of the examinations and x-rays at this hospital.

2. Q. Doctor, paragraph 3 of Headquarters' letter 20 April 1951 (PM) indicates that the limitation of motion of the left leg was present for several years prior to entry into government service. Could you elaborate on the conditions surrounding the limitation of motion of the left leg?

A. It is probable that Boyle had some disability of the left knee on entrance into government service. The precise extent of this disability would be impossible to ascertain at the present time because there is no record available to the board. Undoubtedly the disability has become worse since his entry into the government service, as usually happens in these cases. Boyle gives a history of slipping on the ice while on duty at the Washington Radio Station, and since that time he has had increased pain in the left knee. When Boyle was accepted from the Lighthouse Service into the Coast Guard, it is assumed that the disability involving the left knee was not sufficient to interfere with his performance of duty. It is my opinion that his disability involving the left knee has been aggravated by government service.

3. Q. Doctor, in connection with your previous rating of "Arthritis, hypertrophic, 'with x-ray evidence of involvement of two or more major joints, or two or more minor joint groups, with occasional incapacitating exacerbations,'" rated as 20%, could you elaborate on the number of joints and what particular joints are involved in rating this disability?

A. Previous x-rays of the left knee and left shoulder show evidence of chronic arthritis. Further x-rays taken on 10 May 1951 demonstrate osteoarthritis in the cervical and dorsal spine, and right knee. The right knee and left shoulder are major joints, while the vertebrae of the cervical and dorsal spine constitute groups of minor joints. Furthermore, it would be impossible to distinguish between traumatic arthritis and osteoarthritis in the joints which were injured prior to Boyle's entry into government service. Undoubtedly there is some degree of osteoarthritis present in the latter joints. Accordingly the rating of Arthritis, hypertrophic, with x-ray evidence of involvement of two or more major joints, or two or more minor joint groups is substantiated by the above findings.

4. Q. The Headquarters' letter brings out the fact that the examination revealed some atrophy of the left leg. Could you expand on that for us, doctor?

A. Further examination of the left lower extremity demonstrates the following measurements:

10 cm. above upper border of left patella . . . 40½ cm.
20 cm. below upper border of left patella. . . 34½ cm.

There is some weakness of the flexor and extensor muscles of the left leg. To my knowledge there is no rating in the Veterans' Administration Schedule for Rating Disabilities, 1945 edition, for muscular disabilities except for direct injury to the muscles. While Boyle had some injury to the muscles of the left thigh as a result of the operative procedures for correction of the fracture of the femur, it is my opinion that these injuries were sustained prior to Boyle's entry into government service and were not aggravated by such service. There is no evidence of direct injury to the muscles of the left leg. The muscle injury and atrophy of the left lower extremity are not disabling, in my opinion.

5. Q. Doctor, in your examination on 14 March 1951, Item (20), under "Skin," you refer to two well healed operative scars over the coccygeal region to the right of the midline, "but purulent material can be expressed from both," and "these scars are . . . tender;" whereas you did not include these scars in your disability rating. Have you any additional findings relating to these scars?

A. The scars in the circumcoccygeal region are still slightly tender on reexamination, although there is no evidence of any purulent discharge. Accordingly in my opinion the following diagnosis should be added to the previous diagnoses:

7804 Scars, superficial; tender and painful on objective demonstration . . . . . 10%.

6. Q. Do accepted medical principles indicate that this disability may be of a permanent nature?

A. Yes.

7. Q. Do accepted medical principles indicate that this disability is of a permanent nature?

A. No.

8. Q. Have all reasonable measures for the amelioration of this disabling condition been tried?

A. Yes.

9. Q. Was this disability incurred while Boyle was entitled to receive basic pay?

A. Yes.

10. Q. Was there any information before the medical members of the board which would indicate that this disability may be due to Boyle's intentional misconduct or willful neglect?

A. No.

11. Q. Was there any information before the medical members of the board indicating that this disability was incurred during a period of unauthorized absence of Boyle?

A. No.

12. Q. And what is the percentage assigned to this disability of Boyle's, computed in accordance with the current Veterans' Administration Schedule for Rating Disabilities?

A. As stated previously, ten per centum (10%), under No. 7804.

13. Q. Taking into consideration your reexamination of Boyle on 17 May 1951, what is now the combined percentage of disability of Boyle, computed in accordance with the Veterans Administration Schedule?

A. Sixty per centum (60%).

Neither the board, the recorder, nor the individual concerned desired further to examine this witness; the witness resumed his seat as a member.

The individual concerned was called as a witness. He was informed that the oath previously taken in his case was still binding.

Examined by the recorder:

1. Q. Q. #3 which was previously asked of you was "How long has the limitation of movement in your left leg been bothering you?" Your testimony in answer to that was "Well, I got it broken in 1916, and it was reported in the medical history. Since the operation of putting the plates in, and the wire, and stuff like that about 35 years ago." That answer does not appear to answer the question fully. Could you demonstrate to us approximately how much you could bend your leg at the time you entered the Lighthouse Service?

A. Nearly at right angles.

The witness demonstrated with his right leg the degree that he could previously bend his left leg. This flexion was limited to about 110°.

2. Q. At the time you were accepted into the Coast Guard, Boyle, about how far could you bend your leg then?

A. Practically the same.

3. Q. Do you desire to say anything further concerning your case?

A. No, sir.

Neither the board, the recorder, nor the individual whose physical fitness is being evaluated desired further to examine this witness; the witness resumed his seat as the individual concerned.

The inquiry was finished, the individual concerned withdrawing, having been informed that he would receive due notification when he might regard himself as discharged from further attendance before the board.

After full and mature deliberation, the board substitutes the following

REVISED RECOMMENDED FINDINGS OF FACT

1. Thomas Boyle, machinist's mate, first class, USCG, is unfit to perform the duties of his rating by reason of (002-x0x) Mixed psychoneurosis, (240-912) Osteoarthritis, (143-400.4) Cicatrix of skin of buttock due to trauma, and (x80-190.0) Otitis media, non-suppurative, chronic, which were incurred while entitled to receive basic pay; and (248-416) Arthritis of knee due to simple fracture, which was aggravated while entitled to receive basic pay. The precise degree of pre-service connected arthritis of knee due to simple fracture cannot be determined.

2. That each disability is not due to the intentional misconduct or willful neglect of Boyle, and was not incurred during a period of unauthorized absence or while Boyle was under sentence of a court martial.

3. That such combined disabilities are considered to be 60 per centum disabling in accordance with the current Veterans' Administration Schedule for Rating Disabilities, computed as follows:

	Code No.	Disability	Rating
(a)	9106	Psychoneurosis, mixed types, rated as .	
	9101	Neurasthenia, moderately severe	30%
(b)	5010	Arthritis, due to direct trauma, rated as	
	5261	Leg, limitation of flexion of	
		Flexion limited at 150°	20%
	(NOTE:	In rating this disability, the board took cognizance of paragraphs 4 and 22 on pp. 2 and 7 of the Veterans' Administration Schedule for Rating Disabilities, quoted and interpreted on pp. 13-15 of Law Bulletin No. 180, FEB. 1951.)	
(c)	5003	Arthritis, hypertrophic, "with x-ray evidence of involvement of two or more major joints, or two or more minor joint groups, with occasional incapacitating exacerbations".	20%
(d)	7804	Scars, superficial;	
		tender and painful on objective demonstration	10%
(e)	6201	Otitis media, catarrhal, chronic, rated as	
		Hearing 10 feet in one ear,	
	6258	In the other ear, hearing at 20 feet	0%
(f)	7524	Hydrocele	0%.

4. That Boyle has completed 23 years, 9 months and 14 days of active service.

5. That accepted medical principles indicate that disabilities (a), (b), (c), and (e) above are of a permanent nature, and that (d) and (f) may be of a permanent nature.

To: Captain Rutherford B. Lank, Jr. (1117), USCG - Coast Guard Yard, Curtis Bay, Maryland

Subj: Precept for Coast Guard Physical Evaluation Board.

Ref: (a) Regulations pertaining to Retirement and Separation for Physical Disability.

A Coast Guard Physical Evaluation Board consisting of yourself as president and of any two of the following Coast Guard officers to be designated by you as members: Captain John E. Fairbank (1146), USCG; Commander Elmer E. Comstock (1315), USCG; Commander William F. Creedon (1326), USCG; Commander Alvin H. Giffin (1361), USCG; Commander Clifford S. Gerde (1429), USCG; Commander Gerald T. Applegate (1432), USCG; Lieutenant George C. Fleming (2666), USCG; Lieutenant Ward J. Davies, Jr. (2669), USCG; Lieutenant William E. Dennis (3317), USCG; also any two medical members of the U.S.Public Health Service as authorized by the Administrator, Federal Security Agency, in his letters of March 29, 1946, is ordered to convene at the Coast Guard Yard, U.S.Marine Hospital, Baltimore, Maryland, or any other place in the Baltimore area the president of the Board deems necessary, from time to time as may be necessary for the examination and evaluation of the physical fitness to perform the duties of their office, rank, grade, or rating of such personnel of the United States Coast Guard and Coast Guard Reserve as may be ordered to appear before it. In the event other duties prevent your acting as president of the Board for the consideration of some particular case, you may designate Captain John E. Fairbank (1146), USCG, or either of the next two senior commanders listed above to act as president of the Board for that case.

The proceedings of the board will be in accordance with reference (a).

The junior Coast Guard member of the board will act as recorder.

The Commandant, Coast Guard Yard, will furnish the board with the necessary clerical assistance.

This board is also authorized to consider such cases as are pending before the board convened by the Acting Secretary of the Treasury precept dated February 13, 1950, addressed to Captain John Rountree (1094), USCG.

U. S. Marine Hospital,
Baltimore, Md., 15 March 1951.

The board met at 1:45 p.m.

Present:

Captain Rutherford B. Lank, U. S. Coast Guard, president;
Commander Clifford S. Gerde, U. S. Coast Guard, member;
Lieutenant George C. Fleming, U. S. Coast Guard, member and recorder;
Commander Charles G. Spicknall, U. S. Public Health Service, member;
Lieutenant (junior grade) Frank London, U. S. Public Health Service Reserve, member.

George R. Tullis, chief yeoman, U. S. Coast Guard, entered as the reporter.

The board decided to sit with open doors.

Thomas Boyle, machinist's mate, first class, U. S. Coast Guard, the individual whose physical fitness is being evaluated, entered. Commander William B. Dawson, U. S. Coast Guard, entered. The individual concerned, with the permission of the board, introduced Commander Dawson as his counsel.

The recorder read the precepts and the order to the individual concerned, copies prefixed, marked "A", "B", "C", "D", and "E".

Article 203 (Rights of Individual Concerned) and Article 229 (Rebuttal) of Regulations Pertaining to Retirement and Separation for Physical Disability, approved 10 February 1950, were read and explained to the individual concerned.

The individual concerned stated that he did not object to any member.

The members, recorder and reporter of the board were duly sworn.

A letter, appended marked "F", was received from Headquarters, transmitting the papers mentioned therein, which are appended, marked "1" to "3", inclusive. All pertinent portions of these papers were read by the recorder.

Another letter, appended marked "G", was received from Headquarters in reply to an inquiry from the board. This letter transmitted additional personnel papers, which are appended, marked "4" and "5". All pertinent portions of these papers were read by the recorder.

The medical members submitted a report, in writing, which was sworn to by them, read, and appended marked "6(1)" to "6(9)", inclusive.

Lieutenant (junior grade) Frank London, U. S. Public Health Service Reserve, the junior medical member of the board, was duly sworn as a witness.

Examined by the recorder:

1. Q. State all the causes from which Boyle's disability or disabilities proceed.

A. Mixed psychoneurosis (manifested as Personality, schizoid and Alcohol, use of); Arthritis of knee due to simple fracture; Osteoarthritis; Otitis media, non-suppurative, chronic; Hydrocele of tunica vaginalis due to unknown cause; fracture, simple, of patella, shaft of femur, and lower extremity of radius and ulna, old; and Pilonidal sinus.

2. Q. Do accepted medical principles indicate that each disability may be of a permanent nature?

A. Yes, except that accepted medical principles indicate that the Mixed psychoneurosis (manifested as Personality, schizoid and Alcohol, use of); Arthritis of knee due to simple fracture; Osteoarthritis; Otitis media, non-suppurative, chronic; and fracture, simple, of patella, shaft of femur, and lower extremity of radius and ulna, old, are of a permanent nature.

3. Q. Do accepted medical principles indicate that each disability is of a permanent nature?

A. Yes, except that accepted medical principles indicate that the Hydrocele of tunica vaginalis due to unknown cause and the Pilonidal sinus may be of a permanent nature.

4. Q. Are Boyle's disabilities such as to render him unfit to perform the duties of his rating?

A. Yes.

5. Q. Have all reasonable measures for the amelioration of the disabling condition been tried?

A. Yes.

6. Q. Was each disability incurred while Boyle was entitled to receive basic pay?

A. All disabilities were incurred while Boyle was entitled to receive basic pay except for Fracture, simple, of patella, shaft of femur, and lower extremity of radius and ulna, old; and Pilonidal sinus.

7. Q. Was there any information before the medical members of the board which would indicate that any of Boyle's disabilities may be due to intentional misconduct or willful neglect?

A. No.

8. Q. Was there any information before the medical members of the board indicating that any of the disabilities was incurred during a period of unauthorized absence of Boyle?

A. No.

9. Q. What is the percentage of disability of Boyle, computed in accordance with the current Veterans' Administration Schedule for Rating Disabilities?

A. Sixty per centum (60%).

10. Q. Specify the appropriate Code Numbers in the Schedule on which the disability rating is based and the percentage rating assigned to each disability, commencing with the primary disability.

A.

Code No.

9106 Psychoneurosis, mixed types, rated as

9101 Neurasthenia, moderately severe; characteristic mental and physical fatigability unrelated to disease process or toxic agents, with fairly frequent headaches not due to toxemia, uncorrected visual defect, etc., fairly frequent prolonged periods of insomnia, or objectively ascertained vasomotor instability, approximating neurocirculatory asthenia with decided reduction in exercise tolerance; productive of considerable social and industrial inadaptability 30%

5010 Arthritis, due to direct trauma, rated as

5261 Leg, limitation of flexion of (Flexion limited at 150°). 20%

5003 Arthritis, hypertrophic "with x-ray evidence of involvement of two or more major joints, or two or more minor joint groups, with occasional incapacitating exacerbations". 20%

6201 Otitis media, catarrhal, chronic, rated as

Hearing 10 feet in one ear

6258 In the other ear, hearing at 20 feet 0%

7524 Hydrocele . . . . . 0%.

11. Q. Are the "Fracture, simple of patella, shaft of femur, and lower extremity of radius and ulna, old" considered to be disabling?

A. No. They cause the patient no disability at all. There is no functional abnormality.

12. Q. Is the Pilonidal sinus considered to be disabling?
A. No.

13. Q. Are there any physical defects noted in Boyle's medical history which you have not included in your joint statement?
A. You will note that we have not made a diagnosis of alcoholism. We consider that to be covered by the first diagnosis; that is, it is part of the neurasthenia.

14. Q. In this list of symptoms, under No. 9101, Neurasthenia, does Boyle's case fall under most of those conditions described?
A. Boyle falls under the first requirement, "characteristic mental and physical fatigability unrelated to disease process or toxic agents, with fairly frequent headaches not due to toxemia, uncorrected visual defect, etc." He does not fall under "insomnia", nor "objectively ascertained vasomotor instability with decided reduction in exercise tolerance." He does have "considerable social and industrial inadaptability." Very few people do fit all of those describing clauses of that diagnosis.

15. Q. What would you say is the prognosis in this case in regard to all the disabilities listed?
A. I would say that he is not fit for duty in the Coast Guard. None of these disabilities threatens his life. We have no reason to expect any of them to progress any further, so the prognosis would remain "unfit for duty in the Coast Guard, but able to get along in life."

Neither the board, the recorder, nor the individual concerned desired further to examine this witness; the witness resumed his seat as a member.

Commander Charles G. Spicknall, U. S. Public Health Service, the senior medical member of the board, was duly sworn as a witness.

Examined by the recorder:

1. Q. Do you agree with the testimony just presented by Dr. London?
A. I do.

2. Q. Do you have any additional facts to offer in the case now before this board?
A. I have none.

3. Q. Doctor, one of the disabilities listed for Boyle is use of

alcohol. Would you consider that the use of alcohol is a result of his Mixed psychoneurosis?

A. Yes.

4. Q. Could you expand on your answer, Doctor?

A. Most if not all alcoholics drink for some good reason, in other words to allay anxiety or to attempt to control some other symptom. I think that that is true in the case of Boyle. Because of his functional disease he drinks in order to relieve certain symptoms.

Examined by the board:

5. Q. Could you give reasons why you feel that the Neurasthenia should be considered moderately severe and not moderate?

A. We might start out with the rating of Neurasthenia, severe: "Characteristic findings in marked and persistent form with definite compatible physical asthenia, i.e., loss of weight, circulatory disturbance, vasomotor changes, tremors, objectively substantiated; productive of severe social and industrial inadaptability." Boyle has at least one symptom that would put him in the severe class, that is, tremors. He has had slight loss of weight. He shows no other evidence of the characteristic symptoms for that particular degree of severity. He shows a good many of the symptoms in the "Moderately severe" class, and therefore we feel that he belongs in the "Moderately severe" class rather than "Moderate" or "Severe."

Reexamined by the recorder:

6. Q. I notice, from your Standard Form 506, "In the left knee the patient has a range of motion from 180° to 150°; within the 30° range of motion there is some crunching and grating present." Do you consider that the crunching and grating cause limitation of flexion to 150°?

A. The limitation of flexion in the left knee is not caused solely by crunching and grating, which indicate apposition of the bones and possible presence of joint mice. Probably the limitation of motion is presently caused by the presence of firbrous tissue in and around the joint.

7. Q. In other words, the flexion is not limited by the fact that there is grating and crunching present; he cannot even move his knee beyond the 150° point?

A. That is correct.

8. Q. Would you consider that the use of alcohol is of a permanent nature?

A. I believe, in a man of Boyle's age with a functional disease one of the manifestations of which is the use of alcohol, that this disability is of a permanent nature. In other words, this man has established a pattern of conduct over a number of years, probably, and it would be very unexpected for him to change at the age of 56.

9. Q. Is there any reasonable treatment available for the Mixed psychoneurosis?

A. There is no reasonable treatment available for this disorder. Psychiatric treatment in his case would be prolonged over a period of months or years, and would be of extremely questionable value because of this man's age and attitude toward psychiatric treatment.

Reexamined by the board:

10. Q. In connection with the rating of Arthritis, hypertrophic, Code No. 5003, must this rating be made not only on the basis of limitation of flexion of joints but also on accompanying symptoms of swelling, muscle spasm, or pain?

A. You are referring to the instructions in the Schedule for Rating Disabilities. To my knowledge, Extension 7, paragraph 3, deletes the paragraph "Rate on limitation of motion of joints affected assuming minimum 10 percent rating for each major joint or group of minor joints affected by bone changes, swelling, muscle spasm on motion, or pain objectively substantiated"; accordingly, bone changes, swelling, etc. are not necessary for the rating of Hypertrophic arthritis.

Neither the board, the recorder, nor the individual concerned desired further to examine this witness; the witness resumed his seat as a member.

The individual concerned was duly sworn as a witness.

Examined by the recorder:

1. Q. To the best of your ability and knowledge, will you state the nature of your disabilities, their causes, and how long you have suffered from them?

A. Well, the old fractures. And the arthritis, four or five years or something like that. Then I fell on the ice a while back, and that might have started the worse trouble. That was a couple of years ago while I was going up to the shop, and I was shook up a little.

Examined by the board:

2. Q. Does that give you pain?
A. Yes, sir.

3. Q. How long has the limitation of movement in your left leg been bothering you?

A. Well, I got it broken in 1916, and it was reported in the medical history. Since the operation of putting the plates in, and the wire, and stuff like that about 35 years ago.

4. Q. In your opinion, are you unable to perform the duties of your rating?

A. Due to my illness, I think that I can't perform them in a proper manner.

5. Q. Do you wish to be retired?

A. Well, I don't think I can perform my duties in the manner in which they should be performed. I am not active enough to perform them. At times, with the pain and stuff, I can't hardly move.

Reexamined by the recorder:

6. Q. Do you desire to say anything further concerning your case?
A. No, I hardly think so.

Neither the board, the recorder, nor the individual whose physical fitness is being evaluated desired further to examine this witness; the witness resumed his seat as the individual concerned.

Neither the board, the recorder, nor the individual concerned desired to call any more witnesses.

Thomas Boyle, machinist's mate, first class, the individual whose physical fitness is being evaluated, desired to submit no statement.

Thomas Boyle, machinist's mate, first class, the individual whose physical fitness is being evaluated, desired to make no argument.

The inquiry was finished, the individual concerned withdrawing, having been informed that he would receive due notification when he might regard himself as discharged from further attendance before the board.

After full and mature deliberation, the board makes the following:

RECOMMENDED FINDINGS OF FACT

1. Thomas Boyle, machinist's mate, first class, USCG, is unfit to perform the duties of his rating by reason of (002-x0x) Mixed psychoneurosis; (248-416) Arthritis of knee due to simple fracture; (240-912) Osteoarthritis; (x80-190.0) Otitis media, non-suppurative, chronic; and (757-900.8) Hydrocele of tunica vaginalis due to unknown cause; incurred while entitled to receive basic pay and considered to be the proximate result of performance of active duty.

2. That each disability is not due to the intentional misconduct or willful neglect of Boyle, and was not incurred during a period of unauthorized absence of Boyle or while Boyle was under sentence of a court martial.

3. That such combined disabilities are considered to be 60 per centum disabling in accordance with the current Veterans' Administration Schedule for Rating Disabilities, computed as follows:

	Code No.	Disability	Rating
(a)	9106	Psychoneurosis, mixed types, rated as	
	9101	Neurasthenia, moderately severe	30%
(b)	5010	Arthritis, due to direct trauma, rated as	
	5261	Leg, limitation of flexion of	
		Flexion limited at 150°.	20%
(c)	5003	Arthritis, hypertrophic, "with x-ray evidence of involvement of two or more major joints, or two or more minor joint groups, with occasional incapacitating exacerbations"	20%
(d)	6201	Otitis media, catarrhal, chronic, rated as	
		Hearing 10 feet in one ear,	
	6258	In the other ear, hearing at 20 feet	0%
(e)	7524	Hydrocele	0%

4. That Boyle has completed 23 years, 8 months and 11 days of active service.

5. That accepted medical principles indicate that disabilities (a), (b), (c), and (d) above are of a permanent nature, and that (e) may be of a permanent nature.

U. S. Coast Guard

1. You will make a careful examination into the past and present physical and mental condition of BOYLE, Thomas (221-052), MM1, U. S. Coast Guard, whose case has been referred to this board for examination, and report as to whether he is unfit to perform the duties of his rank, grade, or rating. Standard Forms 504, 505, 506 and (for continuation) 507, Clinical Record, shall be completed, and attached to and made a part of the medical report which shall be executed under oath.

2. Besides a personal examination, you will examine closely all matter transmitted to the board in this case from the files and records of Coast Guard Headquarters, and you will also endeavor to obtain from any other authentic source within your reach such information as will aid the board in the performance of its duties, and will report the result in writing, which shall be in the form of a sworn statement.

NOTE: BOYLE is being ordered to the U. S. Marine Hospital, Baltimore, Maryland, to arrive on the morning of 9 March 1951, for the above-ordered examination.

Not less than three (3) days prior to the date set for the board's hearing all records and papers pertaining to BOYLE's case should be made available to him for examination under such supervision as may be necessary for proper protection of the records. This is a right of the individual concerned set forth in Art. 203(b) of Regulations Pertaining to Retirement and Separation for Physical Disability.

CLINICAL RECORD | HISTORY—Part 1

NATURE AND DURATION OF COMPLAINTS (*Include circumstance of admission*)

"Pains in left lower leg" of about 2 years duration.

HISTORY OF PRESENT ILLNESSES

This 56 year old white male was first admitted to the U.S. Marine Hospital, in Baltimore, on October 20, 1950. He was referred by the Commanding Officer of the Washington Radio Station in Alexandria, Virginia, for a Board of Medical Survey. It was thought at the Radio Station that this man was an alcoholic. A copy of the memorandum referring this patient to the hospital is attached to this report.

On admission the patient gave a history of drinking 4 to 5 pints of whisky a week and stated that he had been a moderate to heavy user of alcohol for many years.

In 1916, prior to his enlistment in the Coast Guard, he was struck by a heavy log in a logging camp on the West Coast. At that time he sustained fractures of the left forearm, the left femur, the left patella and the left leg. He was treated in a local hospital with open reduction and insertion of a metal plate on the left femur. Following the open reduction the patient had continuous drainage from the incision in his left thigh and approximately 8 or 9 months post operatively, a second operation was performed to remove the plate at which time some gauze sponges were found in the wound. Following this second procedure the wound healed and has remained healed. He had no symptoms after that relating to his extremities until about 2 years ago when he slipped and fell on ice. Following this injury he began having intermittent pains in the left shoulder and pains in the lower extremities (both), especially in the left.

The patient was interviewed during his first admission by Senior Surgeon David D. LeGrand, staff neuropsychiatrist. During this interview the patient denied that he is a heavy drinker. He talked about taking a few sips of whisky now and then, but stated that he drinks only 1 to 2 pints of whisky a week. He did admit that he was drinking on duty, but stated that he took only "a sip" while he was fixing a refrigerator. Dr. LeGrand pointed out that his story is probably not accurate since his blood level of alcohol was 4.3 mgm. % on admission. However, it was noted by the nurse on admission that the patient seemed to be only a little unsteady on his feet and that he did not appear to be confused. The patient is the 6th of 10 children and was brought up on a small farm in Western Oregon. He went as far as the 8th grade in school and then quit. He left home around the age of 14 or 15 as he didn't want to settle down

to farm work. He worked in saw mills for the most part up until the time he was around 32 years of age. He then joined the Lighthouse Service. Dr. LeGrand found that it was quite difficult to get much information out of the patient as he seemed to be a person who did not like to talk about himself. He did admit that he had always been pretty much of a "lone wolf." He never wanted to get married because "I have too much fun this way." He claimed that he had been perfectly satisfied with his life. He stated that he had an occasional friend and in general spent his time watching television and "drinking a few beers." He stated that he was "a little nervous," but could say nothing more about this except that his hands shake once in a while. He denied having any depressive illnesses and denied any nervous diseases in his family. He admitted that he gets "pissed off" at certain people at his station. Sometimes he needs help from the seamen but they refuse to work with him. At those times he stated that he didn't care whether or not he gets the job done today or next week.

At that time Dr. LeGrand stated that further information concerning this man should be obtained from his station. There is attached to this report a copy of the report submitted by the Commanding Officer of the Washington Radio Station. After the report was received Dr. LeGrand again interviewed the patient and felt that he was a very schizoid, rather secretive type of individual who does not reveal his feelings. It was Dr. LeGrand's opinion that the therapeutic possibilities in this patient are very limited and he recommended that a Medical Board of Survey be written. During the patient's hospitalization excision of a pilonidal cyst was performed and at the time of discharge from the hospital the operative site had healed completely.

The patient was readmitted to the hospital on March 9, 1951. At that time the patient denied drinking to excess and denied being drunk while on duty. He expressed some hostility concerning the report sent from his station and the reports of the neuro-psychiatrist on his previous admission.

(1) The patient is a well-developed, slightly obese, white male, who appeared to be in no acute distress. He appears to be older than his stated age of 56. He does not appear to be particularly tense or depressed.

(2) Head and Neck - Negative.
(3) Eyes - The patient wears glasses. His uncorrected vision is 20/40 in the right eye and 20/50 in the left eye. He corrects to 20/20 in the right eye and 20/25 in the left eye with a near vision of 14/14 in both eyes. Examination of the fundi shows some increased tortuosity and variation in caliber of the arterioles and some A-V nicking.
(4) Ears - Both tympanic membranes are retracted and scarred with these changes being more prominent on the right side. Hearing for ordinary conversational voice is 10' in the right ear and 20' in the left ear.
(5) Nose - There is minimal anterior septal deviation to the right. No obstruction to breathing is present and no polyps or discharge noted.
(6) Mouth - The patient is edentulous.
(7) Throat - Negative.
(8) Teeth - None present.
(9) Chest - Negative.
(10) Lungs - Negative
(11) Cardiovascular - Pulse sitting 92; pulse immediately after exercise 120; two minutes after exercise 92; standing 100; otherwise negative.
(12) Abdomen - Somewhat obese, but otherwise negative.
(13) Hernia - None
(14) Genitalia - There is a moderate sized right hydrocele which transilluminates.
(15) Rectum - Negative
(16) Prostate - Negative
(17) Back - Negative
(18) Extremities - There is some deformity of the left wrist, but the range of motion is normal. In the left knee the patient has a range of motion from 180 to 150°, within the 30° range of motion there is some crunching and grating present. The patient walks with a limp. There is some crepitation on motion of the left shoulder. Some atrophy of the left thigh is noted.
(19) Neurological - Within normal limits. There is a coarse tremor of the outstretched hands.
(20) Skin - There are well healed operative scars over the left thigh and left knee. Over the coccygeal region to the right of the midline there are two well healed scars, but purulent material can be expressed from both. These scars are slightly tender.
(21) Lymphatics - Negative.

(Sign and date)

Laboratory data: The results of the laboratory examination on the first admission were as follows: CBC, STS and routine urinalysis on admission were negative. Blood alcohol on admission was 4.3 mgm. per cc. The fasting blood sugar was 108 mgm. %, and the total protein was 7 gms. %, with an albumin of 3.9 and a globulin of 3.1. The A/G ratio was 1.3. The serum bilirubin was 2.16mgm. %, with 0.45 mgm. % of direct bilirubin and 1.71 mgm. % of indirect bilirubin. The thymol turbidity was 2 units and the zinc sulphate turbidity 7.5 units. Bromsulfalein test showed 38% dye retention in 60 minutes. Urine urobilinogen was positive in a 1:40 dilution. The serum bilirubin later was 0.42 mgm. %. Electrocardiogram was interpreted as showing a normal tracing. X-ray of the chest was negative. X-ray of the left knee region showed evidence of an old firmly united fracture of the patella. The fragments were wired and the wire was broken into several pieces. The left knee showed gross roughening of the articulating surfaces with marked narrowing of the joint space. The bones were almost in direct contact. X-ray of the sinuses showed slight haziness of the antra with some thickening of the walls. X-ray of the left shoulder showed evidence of chronic arthritis especially of the acromioclavicular joint.

The results of the laboratory examinations on the second admission are as follows: STS, CBC and routine urinalysis negative. Total proteins 6.7 gms. %, albumin 4.2 gms. %, globulin 2.5 gms. %, A/G ratio 1.7. Inorganic phosphorous 2.7 mgm. %, alkaline phosphatase 5.25 units. Bromsulfalein test showed 14% dye retention. Serum bilirubin 0.35 mgm. %, thymol turbidity 1.0 units, zinc sulphate 9.4 units. X-rays were reported as follows: "The left wrist region shows evidence of old fracture of the lower end of the radius and styloid process of the ulna. There is considerable deformity of the lower end of the radius as a result of the fracture, which is firmly united. There is marked irregularity of the articulating surface, the lower end of the radius, and also the carpal bones of the wrist. The left femur shows gross enlargement, considerable irregularity of the surface outline, and increased density of most of the shaft of the femur, as a result of an old fracture. The patella also shows evidence of an old fracture, the fragments having been wired. The articulating surface of the patella and entire knee joint are quite irregular in outline. The left tibia shows changes in the mid third of the shaft apparently from an old fracture in that area with this section of the tibia in good condition at this time."

It is our opinion that this man is disabled for further useful Coast Guard service because of the findings noted above. Psychiatric treatment in his case would be prolonged over a period of months or years and would be of extremely questionable value. Treatment, except for symptomatic measures, is not effective as far as his arthritis and hearing are concerned.

Ref: (a) PHS Medical Director's Memorandum to CDR W. B. DAWSON, USCG dated 7 November, 1950.

1. In compliance with paragraph (1) of reference (a), the following is submitted:

(a) Excerpts from BOYLE'S service record:

Date:	Prof in rating:	Mech ability:	AIM;	Conduct:
9/30/49	3.6	3.6	3.3	4.0
12/31/49	3.6	3.6	3.3	4.0

6/30/50	3.5	3.5	3.0	4.0
9/30/50	3.6	3.6	3.2	4.0

(b) While BOYLE may have been a heavy drinker for many years, it only became noticeable during the past few months as far as drinking on the job is concerned, and although deserving punishment on a few occasions, he was permitted to sleep it off, after taking into consideration his age and the belief that the man was becoming mentally sick, and in need of medical attention rather than confinement. On other occasions when it appeared that BOYLE was unsteady of gait, his infirmities made it difficult to determine whether or not he was considered intoxicated. His normal conversation has always indicated a certain element of impediment of speech which also has hindered, on various occasions, determining whether or not he was a victim of over-indulgence although a rather strong odor of alcohol has usually been evident. His association with men of equivalent ratings has not always been amicable, in fact at times it has appeared that BOYLE'S attitude was indicative of what might be expected of a man with a hang-over, however, there again due to his age as compared to his associates, it was difficult to determine his sobriety. He has constantly complained, during depressive moments no doubt, of the "kids" in the service and explained of how they irritated him by their childish actions. Obviously, this attitude is created because of the fact that the average age of first class petty officers in the service today is around 23 to 25 years, whereas BOYLE will reach his 56th birthday in December of this year. In studying disciplinary measures against BOYLE, I eventually came to the conclusion that BOYLE was displaced when he was accepted in the military service, 10 years ago, following the merger of the old Lighthouse Service with the Coast Guard. While in the Lighthouse Service he was employed, I believe, as a civilian machinist and automatically transferred in the military by Congressional action.

I believe, therefore, that due to this initial displacement, either disappointment or lonesomeness due to the age difference, has affected his happiness and eventually his mind. Since serving at this command he has been treated well and up to a few months ago got along well with the older officers possibly because of respect for his age. He was granted many privileges in extra liberties up to a month or so ago, but lately was denied such privileges.

(c) BOYLE entered the Coast Guard from the former Lighthouse Service 30 April, 1940, and has served in a permanent status since that date. His service record indicates that he completed 12 years 9 months and 23 days in that service which together with his time in the Coast Guard now totals 23 years of service. He has been assigned to duty under this command for the past five years. His work, most of this time has been considered slightly below par but evidently his immediate superiors, have, in recommending his efficiency marks, been giving consideration to his age and infirmities rather than the amount and quality of his work. It is this officers' opinion that BOYLE is not a responsible person to retain on active duty in the Coast Guard and certainly is not fit for service at sea due to his crippled condition. Therefore, it is recommended that he appear before a Medical Board of Survey.

Subj: Retirement from active duty; orders; travel

1. The Coast Guard Physical Evaluation Board convened in your case found that you are unfit to perform the duties of your rating by reason of permanent physical disability amounting to 60 per centum.

2. On 29 June, 1951 the Secretary of the Treasury approved the proceedings and findings of the Board and directed that you be placed on the permanent disability retired list of the United States Coast Guard effective 1 July, 1951 in accordance with Section 402 of the Career Compensation Act of 1949. You are, therefore, retired for permanent disability and your retired pay will commence on 1 July, 1951.

3. You will immediately notify the Commandant (PA) of your mailing address and you will thereafter notify the Commandant (PA) of any change in that address.

4. In the event you desire to obtain medical relief from the Public Health Service for your dependents after retirement, return Form 2533 properly executed in duplicate to the Commandant (PM). Signatures of children, twelve years of age or under, will not be required.

5. Travel expenses incident to the execution of this order are chargeable to Headquarters allotment No. 99-20, under the authorization number indicated above. Transportation of dependents and shipment of household effects to your home of selection will be provided at Government expense only if completed within one year from date of retirement or one year after the official termination of war, whichever is later. Once you have notified the Commandant of arrival at your permanent home action is final and no further designation may be made.

6. Your commanding officer will immediately furnish a copy of this order to the certifying officer having custody of your pay record. The certifying officer will transmit the pay record information to the Commandant (PA) in accordance with existing directives after final credit entries, such as leave allowances, unused leave to be settled for on retirement, etc., have been posted.

ACTION OF PHYSICAL EVALUATION BOARD
IN REVISION

FINDINGS: Thomas Boyle, machinist's mate, first class, USCG, is unfit to perform the duties of his rating by reason of (002-x0x) Mixed psychoneurosis, (240-912) Osteoarthritis, (143-400.4) Cicatrix of skin of buttock due to trauma, and (x80-190.0) Otitis media, non-suppurative, chronic, which were incurred while entitled to receive basic pay; and (248-416) Arthritis of knee due to simple fracture, which was aggravated while entitled to receive basic pay. The precise degree of pre-service connected arthritis of knee due to simple fracture cannot be determined.

That each disability is not due to the intentional misconduct or wilful neglect of Boyle, and was not incurred during a period of unauthorized absence or while Boyle was under sentence of a court martial.

That such combined disabilities are considered to be 60% disabling in accordance with the current Veterans Administration Schedule for Rating Disabilities, computed as follows:

(a) 9106 - Psychoneurosis, mixed types, rated as
9101 Neurasthenia, moderately severe - 30%
(b) 5010 - Arthritis, due to direct trauma, rated as
5261 Leg, limitation of flexion of - Flexion limited at 150° - 20%
(NOTE: In rating this disability, the board took cognizance of paragraphs 4 and 22 on pp. 2 and 7 of the Veterans Administration Schedule for Rating Disabilities, quoted and interpreted on pp.13-15 of Law Bulletin No.180, FEB. 1951.)
(c) 5003 - Arthritis, hypertrophic, "with x-ray evidence of involvement of two or more major joints, or two or more minor joint groups, with occasional incapacitating exacerbations" - 20%
(d) 7804 - Scars, superficial; tender and painful on objective demonstration - 10%
(e) 6201 - Otitis media, catarrhal, chronic, rated as
Hearing in one ear 10 feet,
~~STATEMENT CONCERNING REBUTTAL~~:
6258 - In the other ear, hearing at 20 feet - ~~0~~%
(f) 7524 - Hydrocele - 0%

That Boyle has completed 23 years, 9 months and 14 days of active service.

That accepted medical principles indicate that disabilities (a), (b), (c), and (e) above are of a permanent nature, and that (d) and (f) may be of a permanent nature.

COMMANDER WILLIAM B. DAWSON, COUNSEL FOR BOYLE, ACKNOWLEDGED RECEIPT ON 3 JUNE, 1951, OF A COPY OF THE PROCEEDINGS AND RECOMMENDED FINDINGS IN REVISION OF THE RECONVENED PHYSICAL EVALUATION BOARD AND HAS SUBMITTED A SIGNED STATEMENT THAT HE DOES NOT DESIRE TO SUBMIT A REBUTTAL.

Subj: Transmittal of copy of proceedings in revision, with revised recommended findings; physical evaluation board in the case of BOYLE

1. The Physical Evaluation Board, reconvened on 17 May 1951 at the U.S. Marine Hospital, Baltimore 11, Md., to introduce additional testimony in the case of BOYLE, Thomas (221-052) MM1 USCG, after deliberating on the evidence presented, has decided to substitute revised recommended findings of fact as set forth in the proceedings in revision, a copy of which is transmitted herewith for your information and files. You are requested to acknowledge receipt of such copy, and to complete the statement on the attached copy of this letter relating to BOYLE's desires to file a rebuttal, and to return same, signed, to the President, CG Physical Evaluation Board, U. S. Coast Guard YARD, Baltimore 26, Md.

2. You are again reminded that the individual concerned in a physical evaluation board case, in accordance with Part II, Article 229 of the Regulations Pertaining to Retirement and Separation for Physical Disability, has the right to file a rebuttal to the board's recommended findings within ten (10) days, exclusive of Sundays and holidays, after receipt by him or his counsel of a copy of the proceedings of the board.

From: Commandant

Subj: BOYLE, Thomas (221-052) MM1, Physical Evaluation Board in case of; returned for correction and additional testimony

1. Subject-named man appeared before a Physical Evaluation Board convened at Baltimore, Maryland, 15 March, 1951. The record of proceedings has been reviewed and before final action can be taken on this case the record must be corrected and testimony introduced to support the findings of the Physical Evaluation Board.

2. Review of the Board of Medical Survey and of the Physical Evaluation Board reveals that subject-named man has suffered from frequent headaches, colds, and epistaxis as well as "sinus infection with some tenderness and post nasal drip" for about eight or ten years. X-ray examination confirmed the existance of sinus pathology. In addition the Board of Medical Survey convened on 21 May, 1945 contains the diagnosis of sinusitis, purulent, chronic. From the aforementioned information it appears that a diagnosis of chronic sinusitus may well have been made by the Physical Evaluation Board and appropriate disability allowance made therefore.

3. Both Boards of Medical Survey and the proceedings of the Physical Evaluation Board indicate that subject-named man incurred injuries to the left forearm, left femur, left patella and left leg in 1916, approximately ten years prior to entrance to the lighthouse service. Moreover, there is indication in each of these records that the disability of limitation of motion of the left leg was present for several years prior to entrance into government service and that there has been no aggravation of this disability while in such service.

4. While the Physical Evaluation Board amply substantiates the presence of osteoarthritis of the left shoulder there is no indication of arthritic involvement of this nature in any joints other than the aforementioned traumatized joints. It is not apparent to the Physical Review Council whether the involvement of these injured joints constitutes traumatic arthritis or osteoarthritis. In addition it is to be noted that while "some atrophy is noted" there is presented no further information upon which may be based an evaluation of this abnormality of the left leg.

1. Coast Guard Headquarters has found it necessary to return the record of proceedings in the above-captioned case for correction and additional testimony. The deficiencies found are listed in paragraphs 2, 3, 4, and 5 of the Headquarters' letter which is prefixed to the inclosed record as "A(1)" and "A(2)."

2. Proceedings in revision will accordingly be had at 1:30 p.m., 17 May 1951, at the U. S. Marine Hospital, Baltimore, Md. You will make a careful reexamination into the past and present physical and mental condition of BOYLE and be prepared to testify as to the questions raised by Headquarters' (PM) letter 20 April 1951. The record of this case to date is inclosed as matter transmitted from the files and records of Coast Guard Headquarters.

IN REPLYING, ADDRESS THE

COAST GUARD PHYSICAL EVALUATION BOARD

U.S. Marine Hospital

Baltimore, Maryland, 17 May 1951

From: Senior Surgeon Charles G. Spicknall, and Assistant Surgeon (Reserve) Frank London, U.S. Public Health Service
To: President, Coast Guard Physical Evaluation Board

Subj: Re-examination of Boyle, Thomas (221-052) MM1, U.S. Coast Guard

1. Reference is made to Headquarters letter of 20 April 1951, concerning the above named man.

2. Re-examination of the nose shows minimal anterior septal deviation. There is no obstruction to breathing present and no polyps nor discharge noted. The mucous membrane of the nose appears normal. The paranasal sinuses are clear on X-ray taken on 10 May 1951. Examinations of the nose at this hospital on 15 November 1950 and 9 March 1951, have also been negative. X-ray of the sinuses on 11 November 1950 showed slight haziness of the antra with the walls somewhat thickened. Not infrequently such minor X-ray changes are seen without sinusitis being present. Our examinations have not shown any evidence of sinusitis and it is our opinion that no disability allowance for this disease is justified.

3. While the limitation of motion of the left leg existed prior to Boyle's entry into government service, this man had more pain in the left knee after he slipped on the ice at the Washington Radio Station about two years ago. It is our opinion that his disability in the left knee has been aggravated by government service.

4. Further X-rays of Boyle's joints demonstrate osteoarthritis in the cervical and dorsal spine and right knee. While it is true that the joints of the fractured extremities may be affected by traumatic arthritis, it is our opinion that Boyle has generalized osteoarthritis which affects the traumatized joints as well as the joints not involved in the old fractures. Measurements of the lower extremities are as follows:

10 cm. above upper border of right patella - - - - 42½ cm.
10 cm. above upper border of left patella - - - - 40½ cm.
20 cm. below upper border of right patella - - - - 37 cm.
20 cm. below upper border of left patella - - - - 34½ cm.

There is some weakness of the flexor and extensor muscles of the left leg. It is our opinion that the muscle injuries of the left leg were sustained prior to Boyle's entry into government service and were not aggravated by such service.

1 (1)

5. The scars on the intergluteal fold and gluteal region are still slightly tender on re-examination. Accordingly, the following diagnosis should be added to the previous diagnosis: (143-400.4) Cicatrix of skin of buttock due to trauma.

It is our opinion that this disability was incurred while Boyle was entitled to receive basic pay and is considered to be the proximate result of performance of active duty. It is our opinion further that this disability was not due to the intentional misconduct or willful neglect of Boyle and was not incurred during a period of unauthorized absence of Boyle or while Boyle was under sentence of a court martial. The disability is considered to be not of a permanent nature, but may be of a permanent nature.

The following rating in accordance with the Current Veterans Administration Schedule for Rating Disabilities should be combined with the previously assigned ratings:

7804 Scars, superficial,
Tender and painful on objective demonstration..... 10 %

This 56 year old Coast Guardsman was referred to this hospital by the Commanding Officer of the Washington Radio Station for a Board of Survey. The patient stated on admission that he drinks from 4 to 5 pints of whisky a week at the present time. He has been a moderate to heavy user of alcohol for many years. He does not believe that his drinking interfers with his efficiency. He did not have any complaints at the time of admission.

His past history discloses that he sustained fractures of the left thigh, knee, and left wrist in 1916 prior to his entry into the Service. Since that time he has had some residual limitation of flexion of the knee. He, likewise, stated that he had had a draining right ear about 5 or 6 years prior to admission and that the hearing in that ear was diminished since that time. Two or 3 years prior to admission he began to have mild pain in the left shoulder during the winter. This symptom has continued to the present time.

The patient was interviewed by the staff psychiatrist who obtained from him the following additional history. The patient was born and brought up in a small town in Western Oregon and was the 6th of 10 children. The patient went as far as the 8th grade in school and then quit school and left home around the age of 14 or 15 as he did not 2(1)

Summary of case history:

want to settle down to work on his father's farm. He worked in saw mills for the most part until the time when he was around 32 years of age. He then joined the Lighthouse Service which was taken over by the Coast Guard about 1940. The psychiatrist found it quite difficult to get much information out of the patient as he seemed to be a person who did not like to talk about himself. He stated that he had always been a "lone wolf." He never wanted to get married because apparently he would not like to take the responsibilities that his father had to take with 10 children. He has an occasional friend. In general, he spends his time watching television and "drinking a few beers." He states that he is "a little nervous" but can say nothing more about this except that his hands shake once in a while. He states that he likes his work but does admit that he becomes angry at certain people at the Washington Radio Station. Sometimes he needs help from the seamen but they refuse to work with him. At these times he doesn't care whether he gets the job done that day or the next week.

Information obtained from the Commanding Officer of this patient's station indicated that Boyle's drinking on the job had become much more noticeable in the past few months prior to admission to the hospital. At times his gait was unsteady and there appeared to be some speech difficulties but it could not be determined with accuracy whether or not the patient was intoxicated because of his age and infirmities. He constantly complained of the "kids" in the Service and explained how they irritated him by their childish actions.

Physical Examination: On admission showed a well-developed and nourished white male who appeared to be older than his stated age. There was a coarse tremor of his outstretched hands. His blood pressure was 145/100, pulse 90. Both drums were somewhat scarred. The patient was edentulous. There was a hydrocele on the right. There was

some deformity of the left wrist and there was a long scar on the lateral aspect of the left thigh. Another scar was present over the left patella. The left knee joint showed a range of motion from 180° to 150°. There was some crunching and grating present on movement of the left knee joint. Examination of the right buttock showed an indurated, non tender area. Purulent material could be expressed from this area. Physical examination was otherwise essentially negative.

Laboratory data: CBC, STS and routine urinalysis on admission were negative. Blood alcohol on admission was 4.3 mgm. per cc. The fasting blood sugar was 108 mgm. %, and the total protein was 7 gms. %, with an albumin of 3.9 and a globulin of 3.1. The A/G ratio was 1.3. The serum bilirubin was 2.16 mgm. %, with 0.45 mgm. % of direct bilirubin and 1.71 mgm. % of indirect bilirubin. The thymol turbidity was 2 units and the zinc sulphate turbidity 7.5 units. Bromsulfalein test showed 38% of dye retention in 60 minutes. Urine urobilinogen was positive in a 1:40 dilution. The serum bilirubin later was 0.42 mgm. %. Electrocardiogram was interpreted as showing a normal tracing. X-ray of the chest was negative. X-ray of the left knee region showed evidence of an old firmly united fracture of the patella. The fragments were wired and the wire was broken into several pieces. The left knee showed gross roughening of the articulating surfaces with marked narrowing of the joint space. The bones were almost in direct contact. X-ray of the sinuses showed slight haziness of the antra with some thickening of the walls. X-ray of the left shoulder showed evidence of chronic arthritis especially of the acromioclavicular joint.

Hospital course: The patient was essentially afebrile throughout his hospital stay and was given no medication except for vitamins. He had very few complaints but 2(3)

Diagnosis 1. 240-912 Osteoarthritis 2. 24092.400.4 Ankylosis, fibrous, of left knee joint due to trauma, old 3. 320-100.0 Sinusitis, purulent, chronic 4. 460-533 Hypertensive vascular disease (Chronic or acute; list) Specialty letter - - -

Disability 1,3&4. is not (Is or is not) the result of his own misconduct and 2. was not (Was or was not) incurred in line of duty

Existed prior to enlistment 1,3&4. no (Yes or No) If "Yes," was condition aggravated by service? 2. no (Yes or No)

Present condition Unfit for service Probable future duration indefinite

Recommendation Retired from U. S. Coast Guard

This 50 year old white male was hospitalized from 4 May to 12 May 45 to determine fitness for duty.

FACTS ARE AS FOLLOWS: The patient states that in 1916 he fractured his left femur in a logging accident, and that apparently involved the knee joint because he has been unable to bend the knee more than a few degrees since. He has had recurrent pains in his left knee and left shoulder especially in cold damp weather. He states that in 1943 he contracted a head cold and has been bothered by a chronic nasal stoppage and a post-nasal drip since.

Physical examination reveals a scar over the lateral aspect of left mid-thigh and over the left knee. Flexion of left knee limited to 45 degrees with no pain. Muscles of left thigh and leg moderately atrophic. X-ray of left shoulder shows no radiographic pathology. There is moderate bilateral nasal stoppage expecially on right where there is marked septal deviation. X-ray of simus show frontals, antra, sphenoids clear, and the ethmoids with slight clouding on both sides but this is not marked. Blood pressure was found to be 180/110 Diagnoses are confirmed.

With these disabilities, further retention in the service is not warranted as there is little type of duty that this man could perform. It is the opinion of the Board that the Ankylosis, fibrous of left knee joint was not incurred in the line of duty as the condition was present on enlistment. However, his health record indicates that the other diagnoses were not present on his entrance into the service. This man is not fit for any type of duty and hospitalization is not indicated at this time. Itis also the Board's opinion that the ankylosis has not been aggravated by the service since there has been no appreciable change in the amount of flexibility since the accident in 1916.

It is recommended that this man be brought before a retiring board and retired from the U. S. Coast Guard.

Subj: Examination of Thomas Boyle (221-052), MM 1, U.S. Coast Guard

1. We have carefully and separately examined Thomas Boyle, MM 1, U.S. Coast Guard, as to his past and present physical and mental condition, together with the records pertaining to his case. There is submitted herewith a complete and detailed report of the physical and mental condition of Boyle, executed under oath, together with Standard Forms 504, 505, 506 and 507, attached hereto and made a part hereof.

2. We believe that Boyle is unfit to perform the duties of his rating by reason of, (002-X0X) Mixed psychoneurosis, (-041) Personality, schizoid, (-057) Alcohol, use of, (248-416) Arthritis of knee due to simple fracture, (240-912) Osteoarthritis, (X80-190.0) Otitis media, non-suppurative, chronic, and (757-900.8) Hydrocele of tunica vaginalis due to unknown cause, incurred while entitled to receive basic pay, and (2352, 236, 2313, 2323-416) Fracture, simple of patella, shaft of femur, and lower extremity of radius and ulna, old, (056-029) Pilonidal sinus, not incurred while entitled to receive basic pay, not due to intentional misconduct or willful neglect and not incurred during a period of unauthorized absence; that such combined disabilities are considered to be 60 per centum disabling, computed in accordance with the Current Veterans' Administration Schedule for Rating Disabilities as follows:

NATURE AND DURATION OF COMPLAINTS (*Include circumstance of admission*)

"Pains in left lower leg" of about 2 years duration.

HISTORY OF PRESENT ILLNESSES

This 56 year old white male was first admitted to the U.S. Marine Hospital, in Baltimore, on October 20, 1950. He was referred by the Commanding Officer of the Washington Radio Station in Alexandria, Virginia, for a Board of Medical Survey. It was thought at the Radio Station that this man was an alcoholic. A copy of the memorandum referring this patient to the hospital is attached to this report.

On admission the patient gave a history of drinking 4 to 5 pints of whisky a week and stated that he had been a moderate to heavy user of alcohol for many years.

In 1916, prior to his enlistment in the Coast Guard, he was struck by a heavy log in a logging camp on the West Coast. At that time he sustained fractures of the left forearm, the left femur, the left patella and the left leg. He was treated in a local hospital with open reduction and insertion of a metal plate on the left femur. Following the open reduction the patient had continuous drainage from the incision in his left thigh and approximately 8 or 9 months post operatively, a second operation was performed to remove the plate at which time some gauze sponges were found in the wound. Following this second procedure the wound healed and has remained healed. He had no symptoms after that relating to his extremities until about 2 years ago when he slipped and fell on ice. Following this injury he began having intermittent pains in the left shoulder and pains in the lower extremities (both), especially in the left.

The patient was interviewed during his first admission by Senior Surgeon David D. LeGrand, staff neuropsychiatrist. During this interview the patient denied that he is a heavy drinker. He talked about taking a few sips of whisky now and then, but stated that he drinks only 1 to 2 pints of whisky a week. He did admit that he was drinking on duty, but stated that he took only "a sip" while he was fixing a refrigerator. Dr. LeGrand pointed out that his story is probably not accurate since his blood level of alcohol was 4.3 mgm. % on admission. However, it was noted by the nurse on admission that the patient seemed to be only a little unsteady on his feet and that he did not appear to be confused. The patient is the 6th of 10 children and was brought up on a small farm in Western Oregon. He went as far as the 8th grade in school and then quit. He left home around the age of 14 or 15 as he didn't want to settle down

to farm work. He worked in saw mills for the most part up until the time he was around 32 years of age. He then joined the Lighthouse Service. Dr. LeGrand found that it was quite difficult to get much information out of the patient as he seemed to be a person who did not like to talk about himself. He did admit that he had always been pretty much of a "lone wolf." He never wanted to get married because "I have too much fun this way." He claimed that he had been perfectly satisfied with his life. He stated that he had an occasional friend and in general spent his time watching television and "drinking a few beers." He stated that he was "a little nervous," but could say nothing more about this except that his hands shake once in a while. He denied having any depressive illnesses and denied any nervous diseases in his family. He admitted that he gets "pissed off" at certain people at his station. Sometimes he needs help from the seamen but they refuse to work with him. At those times he stated that he didn't care whether or not he gets the job done today or next week.

At that time Dr. LeGrand stated that further information concerning this man should be obtained from his station. There is attached to this report a copy of the report submitted by the Commanding Officer of the Washington Radio Station. After the report was received Dr. LeGrand again interviewed the patient and felt that he was a very schizoid, rather secretive type of individual who does not reveal his feelings. It was Dr. LeGrand's opinion that the therapeutic possibilities in this patient are very limited and he recommended that a Medical Board of Survey be written. During the patient's hospitalization excision of a pilonidal cyst was performed and at the time of discharge from the hospital the operative site had healed completely.

The patient was readmitted to the hospital on March 9, 1951. At that time the patient denied drinking to excess and denied being drunk while on duty. He expressed some hostility concerning the report sent from his station and the reports of the neuropsychiatrist on his previous admission.

(1) The patient is a well-developed, slightly obese, white male, who appeared to be in no acute distress. He appears to be older than his stated age of 56. He does not appear to be particularly tense or depressed.

(2) Head and Neck - Negative.
(3) Eyes - The patient wears glasses. His uncorrected vision is 20/40 in the right eye and 20/50 in the left eye. He corrects to 20/20 in the right eye and 20/25 in the left eye with a near vision of 14/14 in both eyes. Examination of the fundi shows some increased tortuosity and variation in caliber of the arterioles and some A-V nicking.
(4) Ears - Both tympanic membranes are retracted and scarred with these changes being more prominent on the right side. Hearing for ordinary conversational voice is 10' in the right ear and 20' in the left ear.
(5) Nose - There is minimal anterior septal deviation to the right. No obstruction to breathing is present and no polyps or discharge noted.
(6) Mouth - The patient is edentulous.
(7) Throat - Negative.
(8) Teeth - None present.
(9) Chest - Negative.
(10) Lungs - Negative
(11) Cardiovascular - Pulse sitting 92; pulse immediately after exercise 120; two minutes after exercise 92; standing 100; otherwise negative.
(12) Abdomen - Somewhat obese, but otherwise negative.
(13) Hernia - None
(14) Genitalia - There is a moderate sized right hydrocele which transilluminates.
(15) Rectum - Negative
(16) Prostate - Negative
(17) Back - Negative
(18) Extremities - There is some deformity of the left wrist, but the range of motion is normal. In the left knee the patient has a range of motion from 180 to 150°, within the 30° range of motion there is some crunching and grating present. The patient walks with a limp. There is some crepitation on motion of the left shoulder. Some atrophy of the left thigh is noted.
(19) Neurological - Within normal limits. There is a coarse tremor of the outstretched hands.
(20) Skin - There are well healed operative scars over the left thigh and left knee. Over the coccygeal region to the right of the midline there are two well healed scars, but purulent material can be expressed from both. These scars are slightly tender.
(21) Lymphatics - Negative.

Report on Physical Evaluation Board - Thomas Boyle
or
Continuation of S. F. _____
(Strike out one line) (Specify type of examination or data)

(Sign and date)

Laboratory data: The results of the laboratory examination on the first admission were as follows: CBC, STS and routine urinalysis on admission were negative. Blood alcohol on admission was 4.3 mgm. per cc. The fasting blood sugar was 108 mgm. %, and the total protein was 7 gms. %, with an albumin of 3.9 and a globulin of 3.1. The A/G ratio was 1.3. The serum bilirubin was 2.16mgm. %, with 0.45 mgm. % of direct bilirubin and 1.71 mgm. % of indirect bilirubin. The thymol turbidity was 2 units and the zinc sulphate turbidity 7.5 units. Bromsulfalein test showed 38% dye retention in 60 minutes. Urine urobilinogen was positive in a 1:40 dilution. The serum bilirubin later was 0.42 mgm. %. Electrocardiogram was interpreted as showing a normal tracing. X-ray of the chest was negative. X-ray of the left knee region showed evidence of an old firmly united fracture of the patella. The fragments were wired and the wire was broken into several pieces. The left knee showed gross roughening of the articulating surfaces with marked narrowing of the joint space. The bones were almost in direct contact. X-ray of the sinuses showed slight haziness of the antra with some thickening of the walls. X-ray of the left shoulder showed evidence of chronic arthritis especially of the acromioclavicular joint.

The results of the laboratory examinations on the second admission are as follows: STS, CBC and routine urinalysis negative. Total proteins 6.7 gms. %, albumin 4.2 gms. %, globulin 2.5 gms. %, A/G ratio 1.7. Inorganic phosphorous 2.7 mgm. %, alkaline phosphatase 5.25 units. Bromsulfalein test showed 14% dye retention. Serum bilirubin 0.35 mgm. %, thymol turbidity 1.0 units, zinc sulphate 9.4 units. X-rays were reported as follows: "The left wrist region shows evidence of old fracture of the lower end of the radius and styloid process of the ulna. There is considerable deformity of the lower end of the radius as a result of the fracture, which is firmly united. There is marked irregularity of the articulating surface, the lower end of the radius, and also the carpal bones of the wrist. The left femur shows gross enlargement, considerable irregularity of the surface outline, and increased density of most of the shaft of the femur, as a result of an old fracture. The patella also shows evidence of an old fracture, the fragments having been wired. The articulating surface of the patella and entire knee joint are quite irregular in outline. The left tibia shows changes in the mid third of the shaft apparently from an old fracture in that area with this section of the tibia in good condition at this time."

It is our opinion that this man is disabled for further useful Coast Guard service because of the findings noted above. Psychiatric treatment in his case would be prolonged over a period of months or years and would be of extremely questionable value. Treatment, except for symptomatic measures, is not effective as far as his arthritis and hearing are concerned.

1. In compliance with paragraph (1) of reference (a), the following is submitted:

(a) Excerpts from BOYLE'S service record:

Date:	Prof in rating:	Mech ability:	ALM:	Conduct:

12/31/49	3.6	3.6	3.3	4.0

9/30/50	3.6	3.6	3.2	4.0

(b) While BOYLE may have been a heavy drinker for many years, it only became noticeable during the past few months as far as drinking on the job is concerned, and although deserving of punishment on a few occasions, he was permitted to sleep it off, after taking into consideration his age and the belief that the man was becoming mentally sick, and in need of medical attention rather than confinement. On other occasions when it appeared that BOYLE was unsteady of gait, his infirmities made it difficult to determine whether or not he was considered intoxicated. His normal conversation has always indicated a certain element of impediment of speech which also has hindered, on various occasions, determining whether or not he was a victim of over-indulgence although a rather strong odor of alcohol has usually been evident. His association with men of equivalent ratings has not always been amicable, in fact at times it has appeared that BOYLE'S attitude was indicative of what might be expected of a man with a hang-over, however, there again due to his age as compared to his associates, it was difficult to determine his sobriety. He has constantly complained, during depressive moments no doubt, of the "kids" in the service and explained of how they irritated him by their childish actions. Obviously, this attitude is created because of the fact that the average age of first class petty officers in the service today is around 23 to 25 years, whereas BOYLE will reach his 56th birthday in December of this year. In studying disciplinary measures against BOYLE, I eventually came to the conclusion that BOYLE was displaced when he was accepted in the military service, 10 years ago, following the merger of the old Lighthouse Service with the Coast Guard. While in the Lighthouse Service he was employed, I believe, as a civilian machinist and automatically transferred in the military by Congressional action.

6(8)

I believe, therefore, that due to this initial displacement, either disappointment or lonesomeness due to the age difference, has affected his happiness and eventually his mind. Since serving at this command he has been treated well and up to a few months ago got along well with the older officers possibly because of respect for his age. He was granted many privileges in extra liberties up to a month or so ago, but lately was denied such privileges.

(c) BOYLE entered the Coast Guard from the former Lighthouse Service 30 April, 1940, and has served in a permanent status since that date. His service record indicates that he completed 12 years 9 months and 23 days in that service which together with his time in the Coast Guard now totals 23 years of service. He has been assigned to duty under this command for the past five years. His work, most of this time has been considered slightly below par but evidently his immediate superiors, have, in recommending his efficiency marks, been giving consideration to his age and infirmities rather than the amount and quality of his work. It is this officers' opinion that BOYLE is not a responsible person to retain on active duty in the Coast Guard and certainly is not fit for service at sea due to his crippled condition. Therefore, it is recommended that he appear before a Medical Board of Survey.

From: President, Coast Guard Physical Evaluation Board, Curtis Bay, Md.
To: BOYLE, Thomas (221-052) MM1 USCG
Via: Commanding Officer, Washington Radio Station, Alexandria, Va.

Subj: Examination in revision by Coast Guard Physical Evaluation Board, directive for; time and place, designation of

1. The Coast Guard Physical Evaluation Board of which Captain Rutherford B. Lank, Jr., USCG, was president, has been ordered to reconvene to correct the record and introduce further testimony to support the findings of the Board.

2. You are directed to report at the U. S. Marine Hospital, Wyman Park Drive, Baltimore 11, Maryland, at 1 p.m., 10 May 1951, for observation and examination by Commander Charles G. Spicknall, USPHS, and Lieutenant (jg) Frank London, USPHS(R), who remain the medical members. In connection with the necessary travel, the Board is requesting Headquarters to issue new orders for this purpose.

3. You are also directed to present yourself before the full Board at 1:30 p.m., 17 May 1951 for the re-hearing, which will be held at the U. S. Marine Hospital, Baltimore, Md. Failure of you and your counsel to appear at that time and place would be contrary to the intent of Headquarters.

4. When you are released from further attendance before the board, you will resume your present status.

Subj: BOYLE, Thomas (221-052) MM1; Physical Evaluation Board in case of; proceedings in revision; request for presence of counsel; request for official travel orders for individual concerned

Ref: (a) Headquarters' (PM) ltr 20 April 1951

1. Reference (a), which was addressed to the 5th Coast Guard District in error, was received at this unit on 2 May 1951. It directs that the Physical Evaluation Board in BOYLE's case be reconvened to correct certain deficiencies in the testimony and/or findings, and calls attention to the fact that Article 203 of Regulations Pertaining to Retirement and Separation for Physical Disability applies.

2. The Board will reconvene at the U. S. Marine Hospital, Baltimore, Md., at 1:30 p.m., 17 May, 1951. It is requested that Commander William B. Dawson, counsel for BOYLE, be made available at that time and place if practicable. Commander Dawson is stationed at the Washington Radio Station, Alexandria, Va.

3. The Board has issued orders (copy attached) to BOYLE, who is also stationed at Radio Washington, directing him to present himself before the Board. It is requested that travel orders bearing a HQ Authorization Number be issued covering the necessary travel.

This 56 year old Coast Guardsman was referred to this hospital by the Commanding Officer of the Washington Radio Station for a Board of Survey. The patient stated on admission that he drinks from 4 to 5 pints of whisky a week at the present time. He has been a moderate to heavy user of alcohol for many years. He does not believe that his drinking interfers with his efficiency. He did not have any complaints at the time of admission.

His past history discloses that he sustained fractures of the left thigh, knee, and left wrist in 1916 prior to his entry into the Service. Since that time he has had some residual limitation of flexion of the knee. He, likewise, stated that he had had a draining right ear about 5 or 6 years prior to admission and that the hearing in that ear was diminished since that time. Two or 3 years prior to admission he began to have mild pain in the left shoulder during the winter. This symptom has continued to the present time.

The patient was interviewed by the staff psychiatrist who obtained from him the following additional history. The patient was born and brought up in a small town in Western Oregon and was the 6th of 10 children. The patient went as far as the 8th grade in school and then quit school and left home around the age of 14 or 15 as he did not

Summary of case history:

want to settle down to work on his father's farm. He worked in saw mills for the most part until the time when he was around 32 years of age. He then joined the Lighthouse Service which was taken over by the Coast Guard about 1940. The psychiatrist found it quite difficult to get much information out of the patient as he seemed to be a person who did not like to talk about himself. He stated that he had always been a "lone wolf." He never wanted to get married because apparently he would not like to take the responsibilities that his father had to take with 10 children. He has an occasional friend. In general, he spends his time watching television and "drinking a few beers." He states that he is "a little nervous" but can say nothing more about this except that his hands shake once in a while. He states that he likes his work but does admit that he becomes angry at certain people at the Washington Radio Station. Sometimes he needs help from the seamen but they refuse to work with him. At these times he doesn't care whether he gets the job done that day or the next week.

Information obtained from the Commanding Officer of this patient's station indicated that Boyle's drinking on the job had become much more noticeable in the past few months prior to admission to the hospital. At times his gait was unsteady and there appeared to be some speech difficulties but it could not be determined with accuracy whether or not the patient was intoxicated because of his age and infirmities. He constantly complained of the "kids" in the Service and explained how they irritated him by their childish actions.

Physical Examination: On admission showed a well-developed and nourished white male who appeared to be older than his stated age. There was a coarse tremor of his outstretched hands. His blood pressure was 145/100, pulse 90. Both drums were somewhat scarred. The patient was edentulous. There was a hydrocele on the right. There was

some deformity of the left wrist and there was a long scar on the lateral aspect of the left thigh. Another scar was present over the left patella. The left knee joint showed a range of motion from 180° to 150°. There was some crunching and grating present on movement of the left knee joint. Examination of the right buttock showed an indurated, non tender area. Purulent material could be expressed from this area. Physical examination was otherwise essentially negative.

Laboratory data: CBC, SIE and routine urinalysis on admission were negative. Blood alcohol on admission was 4.3 mgm. per cc. The fasting blood sugar was 108 mgm. %, and the total protein was 7 gms. %, with an albumin of 3.9 and a globulin of 3.1. The A/G ratio was 1.3. The serum bilirubin was 2.16 mgm. %, with 0.45 mgm. % of direct bilirubin and 1.71 mgm. % of indirect bilirubin. The thymol turbidity was 2 units and the zinc sulphate turbidity 7.5 units. Bromsulfalein test showed 38% of dye retention in 60 minutes. Urine urobilinogen was positive in a 1:40 dilution. The serum bilirubin later was 0.42 mgm. %. Electrocardiogram was interpreted as showing a normal tracing. X-ray of the chest was negative. X-ray of the left knee region showed evidence of an old firmly united fracture of the patella. The fragments were wired and the wire was broken into several pieces. The left knee showed gross roughening of the articulating surfaces with marked narrowing of the joint space. The bones were almost in direct contact. X-ray of the sinuses showed slight haziness of the antra with some thickening of the walls. X-ray of the left shoulder showed evidence of chronic arthritis especially of the acromioclavicular joint.

Hospital course: The patient was essentially afebrile throughout his hospital stay and was given no medication except for vitamins. He had very few complaints but

This 56 year old Coast Guardsman was referred to this hospital by the Commanding Officer of the Washington Radio Station for a Board of Survey. The patient stated on admission that he drinks from 4 to 5 pints of whisky a week at the present time. He has been a moderate to heavy user of alcohol for many years. He does not believe that his drinking interfers with his efficiency. He did not have any complaints at the time of admission.

His past history discloses that he sustained fractures of the left thigh, knee, and left wrist in 1916 prior to his entry into the Service. Since that time he has had some residual limitation of flexion of the knee. He, likewise, stated that he had had a draining right ear about 5 or 6 years prior to admission and that the hearing in that ear was diminished since that time. Two or 3 years prior to admission he began to have mild pain in the left shoulder during the winter. This symptom has continued to the present time.

The patient was interviewed by the staff psychiatrist who obtained from him the following additional history. The patient was born and brought up in a small town in Western Oregon and was the 6th of 10 children. The patient went as far as the 8th grade in school and then quit school and left home around the age of 14 or 15 as he did not

Summary of case history:

want to settle down to work on his father's farm. He worked in saw mills for the most part until the time when he was around 32 years of age. He then joined the Lighthouse Service which was taken over by the Coast Guard about 1940. The psychiatrist found it quite difficult to get much information out of the patient as he seemed to be a person who did not like to talk about himself. He stated that he had always been a "lone wolf." He never wanted to get married because apparently he would not like to take the responsibilities that his father had to take with 10 children. He has an occasional friend. In general, he spends his time watching television and "drinking a few beers." He states that he is "a little nervous" but can say nothing more about this except that his hands shake once in a while. He states that he likes his work but does admit that he becomes angry at certain people at the Washington Radio Station. Sometimes he needs help from the seamen but they refuse to work with him. At these times he doesn't care whether he gets the job done that day or the next week.

Information obtained from the Commanding Officer of this patient's station indicated that Boyle's drinking on the job had become much more noticeable in the past few months prior to admission to the hospital. At times his gait was unsteady and there appeared to be some speech difficulties but it could not be determined with accuracy whether or not the patient was intoxicated because of his age and infirmities. He constantly complained of the "kids" in the Service and explained how they irritated him by their childish actions.

Physical Examination: On admission showed a well-developed and nourished white male who appeared to be older than his stated age. There was a coarse tremor of his outstretched hands. His blood pressure was 115/100, pulse 90. Both drums were somewhat scarred. The patient was edentulous. There was a hydrocele on the right. There was

some deformity of the left wrist and there was a long scar on the lateral aspect of the left thigh. Another scar was present over the left patella. The left knee joint showed a range of motion from 180° to 150°. There was some crunching and grating present on movement of the left knee joint. Examination of the right buttock showed an indurated, non tender area. Purulent material could be expressed from this area. Physical examination was otherwise essentially negative.

Laboratory data: CBC, STS and routine urinalysis on admission were negative. Blood alcohol on admission was 4.3 mgm. per cc. The fasting blood sugar was 108 mgm. %, and the total protein was 7 gms. %, with an albumin of 3.9 and a globulin of 3.1. The A/G ratio was 1.3. Subj: National Service Life Insurance, Policy No. 2 346 492
Expiration of term insurance.

1. There is herewith forwarded a notification from the Veterans Administration that the $2,000 level term National Service Life Insurance issued under policy number N 2 346 492 will expire on 31 March, 1950. In order that you may continue to have the protection of this insurance, it must be renewed or, if you prefer, it may be converted to one of the six permanent plans, i.e., Ordinary Life, 30-Payment Life, 20-Payment Life, 20-Year Endowment, Endowment at age 60 or Endowment at age 65.

2. In view of the fact that the application for renewal of insurance on the five-year level term plan or application for converted insurance must reach the Veterans Administration before the expiration of the current term period, you are urged to take immediate steps toward completing the application and making the necessary allotment adjustment.

3. There is in effect at the present time an allotment of your pay in the amount of $2.28 per month for premiums on National Service Life Insurance as follows:

$2.28 - $2,000 term insurance N 2 346 492 effective 1 April,1942.
($2.16 correct premium per month)

If insurance is renewed, the new allotment should be $3.54. Your authorized certifying officer should be instructed to discontinue the $2.28 allotment with the month of last payment February, 1950 and to establish the new allotment, reflecting the increased premium, effective with the month of first payment March, 1950.

4. The completed application, in duplicate, together with the necessary allotment adjustment (Forms CG-2528 and CG-2528A) should be forwarded to the Commandant (PMM) for transmittal to the Veterans Administration.

5. Advise Commandant (PMM) of action that will be taken by you in connection with your National Service Life Insurance.

Headquarters has carefully reviewed the information contained in Report of Medical Survey, U. S. Marine Hospital, Seattle, Washington, dated 21 May, 1945, with indorsements thereon, and does not concur with the recommendation that subject man be retired from service. In the opinion of Headquarters Boyle's disabilities are insufficient to warrant his being retired. Therefore, subject-named man will be retained in service and be assigned to duty commensurate with his disability. The Class (M) designator will be placed before his service number, and the procedure outlined in paragraph (2) of Personnel Bulletin No. 78-44 will be observed.

Present condition Unfit for service Probable future duration indefinite

Recommendation Retired from U. S. Coast Guard

This 50 year old white male was hospitalized from 4 May to 12 May 45 to determine fitness for duty.

FACTS ARE AS FOLLOWS: The patient states that in 1916 he fractured his left femur in a logging accident, and that apparently involved the knee joint because he has been unable to bend the knee more than a few degrees since. He has had recurrent pains in his left knee and left shoulder especially in cold damp weather. He states that in 1943 he contracted a head cold and has been bothered by a chronic nasal stoppage and a post-nasal drip since.

Physical examination reveals a scar over the lateral aspect of left mid-thigh and over the left knee. Flexion of left knee limited to 45 degrees with no pain. Muscles of left thigh and leg moderately atrophic. X-ray of left shoulder shows no radiographic pathology. There is moderate bilateral nasal stoppage expecially on right where there is marked septal deviation. X-ray of sinus show frontals, antra, sphenoids clear, and the ethmoids with slight clouding on both sides but this is not marked. Blood pressure was found to be 180/11[illegible] Diagnoses are confirmed.

With these disabilities, further retention in the service is not warranted as there is little type of duty that this man could perform. It is the opinion of the Board that the Ankylosis, fibrous of left knee joint was not incurred in the line of duty as the condition was present on enlistment. However, his health record indicates that the other diagnoses were not present on his entrance into the service. This man is not fit for any type of duty and hospitalization is not indicated at this time. Itis also the Board's opinion that the enkylosis has not been aggravated by the service since there has been no appreciable change in the amount of flexibility since the accident in 1916.

It is recommended that this man be brought before a retiring board and retired from the U. S. Coast Guard.

From: Commandant
To: BOYLE, Thomas (221-051), United States Coast Guard
Via: Commanding Officer, CG Radio Station, Alexandria, Va.

Subj: Retirement from active duty; orders; travel

1. The Coast Guard Physical Evaluation Board convened in your case found that you are unfit to perform the duties of your rating by reason of permanent physical disability amounting to 60 per centum.

2. On 29 June, 1951 the Secretary of the Treasury approved the proceedings and findings of the Board and directed that you be placed on the permanent disability retired list of the United States Coast Guard effective 1 July, 1951 in accordance with Section 402 of the Career Compensation Act of 1949. You are, therefore, retired for permanent disability and your retired pay will commence on 1 July, 1951.

3. You will immediately notify the Commandant (PA) of your mailing address and you will thereafter notify the Commandant (PA) of any change in that address.

4. In the event you desire to obtain medical relief from the Public Health Service for your dependents after retirement, return Form 2533 properly executed in duplicate to the Commandant (PM). Signatures of children, twelve years of age or under, will not be required.

5. Travel expenses incident to the execution of this order are chargeable to Headquarters allotment No. 99-20, under the authorization number indicated above. Transportation of dependents and shipment of household effects to your home of selection will be provided at Government expense only if completed within one year from date of retirement or one year after the official termination of war, whichever is later. Once you have notified the Commandant of arrival at your permanent home action is final and no further designation may be made.

6. Your commanding officer will immediately furnish a copy of this order to the certifying officer having custody of your pay record. The certifying officer will transmit the pay record information to the Commandant (PA) in accordance with existing directives after final credit entries, such as leave rations, unused leave to be settled for on retirement, etc., have been posted.

For and in consideration of the pay or wages due to the ratings which may from time to time be assigned me during the continuance of my service, I agree to and with W.B.DAWSON,CDR of the United States Coast Guard, as follows:

First: To enter the Coast Guard of the United States and to report to such station or vessel as I may be ordered to join, and to the utmost of my power and ability discharge my several services or duties and be in everything conformable and obedient to the several requirements and lawful commands of the officers who may be placed over me.

Second: I oblige and subject myself to serve { THREE (3) years from 19 July, 1949 / ~~for the period of the present emergency~~ }

unless sooner discharged by proper authority.

* Citizenship—Use expressions "NB" for native born; "NZ" for naturalized; "NPI" for native of Philippine Islands; "NPR" for native of Puerto Rico.

16—8420-2

In the event of war or National emergency declared by the President to exist during my term of service, I oblige and subject myself to serve until 6 months after the end of the war or National emergency if so required by the Secretary of the Navy unless I voluntarily reenlist or extend my enlistment. I understand that when so detained, I am not entitled to enlistment allowance and that in time of war the addition of one-quarter pay as specified in the Act of July 11, 1941, is not applicable.

I also oblige myself, during such service, to comply with and be subject to such laws, regulations, and discipline for the government of the Coast Guard as are or shall be established by the Congress of the United States or other competent authority, and to submit to treatment for the prevention of smallpox, typhoid (typhoid prophylaxis), and to such other preventive measures as may be considered necessary by proper authorities.

Third: I am of the legal age to enlist; I have never deserted from the United States Coast Guard, Navy, Army, or Marine Corps; I have never been discharged from the United States Service or other service on account of disability or through sentence of either civilian or military court; and I have never been discharged from any service, civil or military, except with good character and for the reasons given by me to the recruiting officer prior to enlistment. I am not a member of the Coast Guard Reserve, Naval Reserve, Naval Militia, Marine Corps Reserve, National Guard, or Army Reserve.

Fourth: I understand that upon enlistment in the Coast Guard Reserve, I may be ordered to active duty in time of war, or when in the opinion of the President a National emergency exists, and that I may be required to perform active duty throughout the war or until the National emergency ceases to exist and for 6 months thereafter.

Fifth: I have had this contract fully explained to me, I understand it, and certify that no promise of any kind has been made to me concerning assignment to duty, or promotion during my enlistment.

Oath of Allegiance: I, Thomas Boyle, do solemnly swear (or affirm) that I will bear true faith and allegiance to the United States of America, and that I will serve them honestly and faithfully against all their enemies whomsoever, and that I will obey the orders of the President of the United States and the orders of the officers appointed over me, according to the laws of the United States and the regulations governing the Coast Guard.

And I do further swear (or affirm) that all statements made by me as now given in this record are correct.

For and in consideration of the pay or wages due to the ratings which may from time to time be assigned me during the continuance of my service, I agree to and with W.B.DAWSON,CDR of the United States Coast Guard, as follows:

First: To enter the Coast Guard of the United States and to report to such station or vessel as I may be ordered to join, and to the utmost of my power and ability discharge my several services or duties and be in everything conformable and obedient to the several requirements and lawful commands of the officers who may be placed over me.

Second: I oblige and subject myself to serve { THREE (3) years from 19 July, 1949 / ~~for the period of the war~~ } unless sooner discharged by proper authority.

* Citizenship—Use expressions "NB" for native born; "NZ" for naturalized; "NPI" for native of Philippine Islands; "NPR" for native of Puerto Rico.

16—8420-2

In the event of war or National emergency declared by the President to exist during my term of service, I oblige and subject myself to serve until 6 months after the end of the war or National emergency if so required by the Secretary of the Navy unless I voluntarily reenlist or extend my enlistment. I understand that when so detained, I am not entitled to enlistment allowance and that in time of war the addition of one-quarter pay as specified in the Act of July 11, 1941, is not applicable.

I also oblige myself, during such service, to comply with and be subject to such laws, regulations, and discipline for the government of the Coast Guard as are or shall be established by the Congress of the United States or other competent authority, and to submit to treatment for the prevention of smallpox, typhoid (typhoid prophylaxis), and to such other preventive measures as may be considered necessary by proper authorities.

Third: I am of the legal age to enlist; I have never deserted from the United States Coast Guard, Navy, Army, or Marine Corps; I have never been discharged from the United States Service or other service on account of disability or through sentence of either civilian or military court; and I have never been discharged from any service, civil or military, except with good character and for the reasons given by me to the recruiting officer prior to enlistment. I am not a member of the Coast Guard Reserve, Naval Reserve, Naval Militia, Marine Corps Reserve, National Guard, or Army Reserve.

Fourth: I understand that upon enlistment in the Coast Guard Reserve, I may be ordered to active duty in time of war, or when in the opinion of the President a National emergency exists, and that I may be required to perform active duty throughout the war or until the National emergency ceases to exist and for 6 months thereafter.

Fifth: I have had this contract fully explained to me, I understand it, and certify that no promise of any kind has been made to me concerning assignment to duty, or promotion during my enlistment.

Oath of Allegiance: I, Thomas Boyle do solemnly swear (or affirm) that I will bear true faith and allegiance to the United States of America, and that I will serve them honestly and faithfully against all their enemies whomsoever, and that I will obey the orders of the President of the United States and the orders of the officers appointed over me, according to the laws of the United States and the regulations governing the Coast Guard.

And I do further swear (or affirm) that all statements made by me as now given in this record are correct.

From: Commander, Seattle District.
To: Commandant.

Subject: Thomas Boyle, Oiler, Tender MANZANITA, Transfer to Destruction Island Lightstation as Assistant Keeper.

References: (a) District letter of 29 Jan.,1940, reporting detail of Boyle.
(b) Appointment, approved 6 March, 1940, showing transfer and change in status of Boyle from Oiler to Keeper.

1. In paragraph 2, reference (a), it was stated that Boyle was enroute to Destruction Island Lightstation for duty as an assistant keeper. He was landed there at 7:30 AM on 2 February, therefore was paid on the MANZANITA payroll for February for only 1/30 month, with notation in the remarks column showing that he was transferred to Keeper effective 2 Feb.

2. In view of the fact that his appointment, reference (b), was not approved until 6 March, advice is requested as to the proper procedure for paying him for his services for the period 2 February - 5 March, 1940. If possible, it appears that the Department might furnish a revised appointment which would show date of approval of abbut 1 February, not later than 2 Feb.

3. If the above is not practicable, please advise whether it would be proper to pay Boyle for that period as an Oiler, Tender MANZANITA, with notation on the payroll that he was detailed during that period for duty as a keeper, therefore paid from the Salaries Keepers appropriation. He could then be regularly picked up as a Keeper effective 6 March.

4. Advice is requested as to whether an oath of office is required in a case of this kind, where an Oiler or Quartermaster on a vessel, having Civil Service status, is transferred to a keeper position.

5. Reply by dispatch is requested, to permit early payment for services rendered during February.

HEADQUARTERS 1st indorsement 26 March, 1940

From: Commandant
To: Commander, Seattle District

With reference to payment of Mr. Boyle's salary, Headquarters advised you by dispatch of this date as follows:

"PAY THOMAS BOYLE AS OILER ON VESSEL ROLL TO CLOSE FIVE MARCH AND TAKE UP ON KEEPER ROLL FOLLOWING DATE ACCORDANCE DEPARTMENT AUTHORITY FOR CHANGE IN STATUS SEE INDORSEMENT THIS DATE ON YOUR LETTER TWENTY TWO MARCH THIS MATTER"

In view of the fact that any change in the status of classified civil service personnel requires the prior approval of the Department, a notation such as that mentioned in your paragraph 1 should not be made on the pay roll prior to receipt of authority for such change in the specific case.

As to your paragraph 4, Oath of Office and Personal History Sheet, both in duplicate, are required in connection with any change from unappointed to appointed status. in the case of civil personnel.

Remarks: * No change will be made in this employee's total or gross compensation or grade during the present fiscal year owing to the prohibition in Section 10b of the Reorganization Act of 1939 on changes in compensation. For record purposes, however, recommendation is submitted pursuant to Comp. Gen. B-5213 of August 22, 1939, to the Federal Security Agency. However, upon entrance on duty at his new station this employee's compensation will be $65 a month cash plus quarters valued at $20 a month (which is the same as his present compensation on the MANZANITA) for the remainder of the present fiscal year.

Justification: On October 9, 1939, the Department approved Mr. Boyle's transfer from oiler to Keeper at Cape Flattery light station. Subsequently an enlisted man was assigned to the duties of that position in view of which Mr. Boyle's transfer was not carried into effect. Consequently, it is recommended that this employee's transfer to Cape Flattery be cancelled, and his transfer to Destruction Island approved in lieu thereof.

U. S. COAST GUARD
REC'D FEB 2 1940

From: Commander, Seattle District.
To : Commandant.

Subject: Thomas Boyle, Oiler, Tender MANZANITA; transfer to Destruction Island Light Station.

Reference: (a) Dispatch to Headquarters, 26 January, 1940
(b) Form 73a, dated 26 January, recommending transfer to Destruction Island instead of Cape Flattery.
(c) Headquarters dispatch dated 27 January, 1940.

1. In compliance with reference (c), Headquarters is advised that the vacancy at Cape Flattery Light Station, to which it was proposed to transfer Thomas Boyle, has been filled by permanent assignment of an enlisted Coast Guard man. Subsequently a vacancy developed at Destruction Island Light Station, resulting from the transfer of 1st assistant Keeper R. P. Butler to Grays Harbor Light Station, and it was decided to transfer Mr. Boyle to Destruction Island to fill this vacancy, the pay and range of Destruction Island being identical with Cape Flattery.

2. Mr. Boyle is not married and therefore it was necessary for him to purchase household goods to equip his quarters at the station. This he has done, and he is now enroute for the station via the Tender MANZANITA, which left Seattle this date for return to Astoria, Oregon. It is therefore recommended that his transfer to Destruction Island in lieu of Cape Flattery Light Station be approved.

3. The transfer of Thomas Boyle to Cape Flattery was not effected before this time as he interposed an objection to the transfer at a rate of pay less than his combined salary and subsistence allowances on the Tender MANZANITA, for the balance of this fiscal year. He has since indicated his willingness to accept transfer to the position of 1st Assistant Keeper at the rate of $85.00 per month, at Destruction Island Light Station. This arrangement is advantageous to the Service for otherwise it would necessitate moving the household goods of Ben Newton, QM3c, now assigned to Cape Flattery.

W. H. MUNTER

F. C. HINGSBURG
Chief of Staff

Chief Personnel Officer.

With reference to the Seattle District's attached recommendation in the case of Thomas Boyle, his regular position was that of oiler on the MANZANITA. His transfer to a position at Cape Flattery has heretofore been approved, but for the reasons stated in the District's attached form 73a this transfer has not yet been carried into effect, and the district now proposes to transfer him to Destruction Island instead of to Cape Flattery, no change in pay being involved. Since this involves a transfer from a vessel position to a shore position, it is understood that it is OK to proceed with it as proposed by the district.

From: Commandant
To: Commander, Seattle District

Subject: Thomas Boyle; transfer to keeper; compensation

Reference: (a) District letter of 25 November, 1939
(b) Department approval of 9 October, 1939
(c) Headquarters letter of 14 November, 1939

Reference (a) raises the question as to what the cash compensation of Mr. Boyle will be upon entrance on duty as keeper at Cape Flattery Light Station. In view of the fact that quarters valued at $240 per annum are attached to that position and because Section 10b of the Reorganization Act of 1939 prohibits a change in gross compensation during this fiscal year, his pay at Cape Flattery will be $85 a month less $20 a month for the use of quarters.

In future similar cases of this kind a statement will be included under remarks on the appointment to show that quarters will be deducted from the present pay of the employee.

By direction,

C. H. JONES,
Chief Personnel Officer.

5 1. Reference (b) authorizes the transfer of subject employee to Cape Flattery Light Station as keeper but without change in total or gross compensation or in grade during the present fiscal year, which is that of Oiler at $85 a month on the Tender MANZANITA. Reference (a) advises that the subsistence and quarters on the MANZANITA cannot be considered as part of compensation additional to the $85 a month.

2. It is therefore understood that if subject employee goes to Cape Flattery Light Station prior to 1 July, 1940, on duty as keeper, but does not occupy quarters at that station and instead makes arrangements for boarding with others at the station at his own expense, his net cash pay to be paid on the payroll will be $85.00 per month.

3. If, however, subject employee occupies one of the quarters at the station for the which the authorized rate is $240 per annum, should there be deducted $20 per month making net $65.00 per month payable to the employee in cash?

4. Mr. Boyle's transfer has not yet been effected, and this information is desired so that the employee may be fully informed when accepting the transfer.

From: Commander, Seattle District.
To: Commandant.

1. Forwarded. Thomas Boyle, Oiler on the tender MANZANITA receives in addition to $85 per month compensation, quarters and subsistence. By transferring to Cape Flattery Light Station it is not considered proper to make a deduction for quarters from the cash pay. It is therefore recommened that permission to occupy family quarters be granted without deduction from cash pay.

From: Commandant
To: Commander, Seattle District

Subject: Thomas Boyle; compensation

Reference: (a) District letter of 3 November, 1939
(b) Department approval of 9 October, 1939

Reference (b) authorized the transfer of the subject employee from oiler at $85 a month on the Tender MANZANITA to keeper at Cape Flattery Light Station at $1380 per annum plus $240 for quarters, but without change in pay during the present fiscal year on account of the prohibition in Section 10b of the Reogranization Act of 1939 on changes in compensation. Reference (a) proposes that the subject employee be given his present cash pay and in addition thereto cash in lieu of subsistence on the vessel.

Subsistence and quarters on vessels of the Lighthouse Service were not considered a part of the compensation of the employees thereon, and this has heretofore been recognized. Consequently they can not be considered a part of the compensation of the subject employee for the purpose indicated in reference (a).

1. Reference (a) authorizes the transfer and change in duties of Thomas Boyle from oiler on the Tender Manzanita at $85.00 per month to Keeper at $1380 per annum, in the range of $1380-1740 per annum, plus quarters valued at $240 per annum, Cape Flattery Light Station.

2. Mr. Boyle now receives, in addition to $85 per month, as oiler on the Tender Manzanita, his quarters aboard the vessel and commutation of rations are paid to the officer in charge of mess on the vessel at the rate of $19.20 per month, less 10%, or $17.28 per month for his subsistence.

3. He has not yet entered on duty in his new position and requests that his new pay be $85.00 per month plus the value of his present subsistence quarters, which would be $102.28 plus the value of quarters furnished him on the vessel.

4. It is recommended that his cash pay be $102.80, and quarters on board ship, which includes bed clothing, towels, etc., and laundry of same, be considered equivalent to quarters at the station, with nothing furnished except stoves.

June 28, 1939.

The Superintendent,
17th Lighthouse District,
Portland, Oregon.

Dear Mr. Hingsburg:-

Receipt is acknowledged of your letter of June 26, signed by the Assistant Superintendent, in the case of Thomas F. Boyle:

From your letter it appears Mr. Boyle has acquired a classified status as OILER, $85.00 per month, effective March 29, 1938, under the provisions of Section 6, Civil Service Rule II. It is noted you state item covering his classification will appear on your June, 1939, report of changes.

Inasmuch as your recommendation for his transfer and change of status from OILER, $85 per month, on the Tender "Manzanita" to KEEPER, FIRST ASSISTANT, $1380 per annum and quarters valued at $240, Cape Flattery Light Station, would involve a change from a noneducational to an educational position, it is being forwarded without action by this office direct to the Commissioner of Lighthouses, Washington, D. C. If the Department approves the proposed transfer and change of status, it will arrange with the U. S. Civil Service Commission at Washington for a suitable examination for Mr. Boyle.

Future recommendations of this type--involving change from noneducational to educational positions--should be forwarded direct to the Department.

Very truly yours,

J. C. BECK,
Acting District Manager.

Copy to Comm'r Lighthouses
(with report)

May 10, 1939.

Commissioner of Lighthouses:

In accordance with the Department's recent recommendation, the Civil Service Commission has approved the classification under section 6 of civil-service rule II of the following-named employees in the Seventeenth Lighthouse District:

Name	Position	Salary	Date of Authority
Thomas Boyle	Oiler	$85.00 per month	April 19, 1939
Charles W. Hickey	Oiler	$85.00 per month	April 19, 1939

By direction of the Secretary:

(Signed) Oliver C. Short

OLIVER C. SHORT
Director of Personnel.

BUREAU OF LIGHTHOUSES
Washington

May 17, 1939

Referred to the Superintendent of Lighthouses, Portland, Oregon. The effective date of classification in this and any other cases of petty officer or light attendant authorized pursuant to Executive Order No. 7852 of March 29, 1938, are to be reported on Form 4a as "classified March 29, 1938", the Bureau's circular letter No. 778 of April 15, 1939, to the contrary not withstanding. The instructions contained in the Bureau's circular letter, above referred to, were based on the Civil Service Commission's Departmental circular No. 181, which it is now informally understood from the Department does not apply to cases under Executive Order No. 7852, the Commission having indicated at the time that the effective date of any cases classified thereunder could be reported as retroactive to the date of the Executive Order. However, the instructions in Bureau circular letter No. 778 are to be followed in reporting effective dates of classification of stewards.

Superintendent of Lighthouses
Portland, Oregon

In connection with the examination of the medical certificates of the petty officers recommended by your office to be given a classified civil service status pursuant to Executive Order No. 7852, dated March 29, 1938, the Bureau found that certain of these employees, whose names are shown below, had certain weaknesses as to physical ability or that there were other defects, all of which have been noted opposite the employees' names below.

Name	Designation	Physical Exertion
Albin R. Soderlind	Oiler	Moderate (hernia)
Henry Eskola	Quartermaster	Moderate (hernia)
Charles W. Hickey	Oiler	Moderate
Thomas Boyle	Oiler	Light (arthritis)

The Bureau has not recommended any petty officer for a classified status who was shown in the certificate of medical examination to be capable of performing less than arduous duty or who was shown to be unfit for duty because of other physical weaknesses or defects. However, the Bureau would have no objection to a reexamination by a Public Health Physician of these employees if they are performing their duties satisfactorily and your office feels that they are capable of continuing to do so. Your report as to whether any of these cases will be taken up further is requested and if such action is contemplated, it should be proceeded with promptly.

The aim of the Executive order of [illegible]4, 1924, and of this examination thereunder [illegible] obtain information as to the physical condition of appointees t[illegible]ied civil service with a view to promot[illegible]y and minimizing accidents and claims under United States em[illegible]ees' [illegible]mpensation laws.

NOTES FOR EXAMINING PHYSICIAN

WEIGHT.—Males, without clothing, and also in ordinary clothing without overcoat or hat (weigh twice); females, clothed, but without wrap or hat. If overweight, state whether due to bone and muscle or to fat.

HEIGHT.—Without boots or shoes; observe that no appliances are used to increase.

The examination should include the following observations, as to—

1. EYES.—Ptosis; discharge; corneal scar; pterygium. In recording distant vision consider 20 feet as normal and report all vision as a fraction with 20 feet as numerator and the smallest type read at 20 feet as denominator. If glasses are used, record for each eye the finding with and without glasses.*

2. EARS.—Evidence of middle ear or mastoid disease; condition of drums; discharge. In recording hearing, record 20 feet as normal distance for conversational voice and record deviation from normal as fraction with 20 as denominator and actual distance as numerator.

3. NOSE.—Ability to blow through each nostril. If free, a speculum examination would not be indicated.

4. MOUTH.—Missing teeth, pyorrhea.

5. THROAT.—Tonsils, hypertrophy or disease.

6. THYROID.—Presence of tumor in neck and tremor, exophthalmos; nervous high-strung disposition, especially in women.

7. HEART.—Murmurs. State whether functional or organic. If valvular disease exists, state whether or not it is fully compensated.

8. LUNGS.—It is necessary that the auscultatory cough be used. Tuberculosis; if present, state whether active or arrested, and if arrested your opinion as to how long it has been quiescent. Sputum to be examined for tubercle bacilli in all suspected cases.

9. INGUINAL RINGS.—Hernia; no hernia, but impulse on coughing; no hernia or impulse, but abnormally large rings. Any other hernia should be noted, and if present describe fully and state whether it is retained by well-fitting truss.

10 to 13. Scars, deformities, atrophies, paralyses, or flat foot of such a nature as to incapacitate or become aggravated by work or be later alleged as caused by accident or occupation. By "flat foot", as used in this form, is meant a foot with impaired function, the term being equivalent to "fallen or misplaced arch", an abnormal condition. Impairment of function is the point to be noted. It is not intended that small, insignificant blemishes which might be referred to as marks of identification be recorded.

14. This entry should include symptoms and full history of any mental or nervous abnormality.

15. Urinalysis to be made and blood pressure to be taken when especially indicated, particularly in persons over 40 when arteriosclerosis, nephritis, or diabetes is suspected.

Record, if taken—Urinalysis—sp. gr. _____ Albumen _____ Sugar _____ Casts _____

Blood pressure: Mm. Hg. systolic 150 Mm. Hg. diastolic 92
