CONTINUATION OF DESCRIPTION OF DISABILITY +

(1) As noted, although no organic lesion can be found to indicate a cardiac lesion except an occasional extra systole, yet according to patient's history, I think he undoubtedly has some myocarditis somewhat decompensated judging by his difficulty in breathing on slight exertion, moderate athoprea and swelling of ankles at times

(2) I cannot account for the convulsions which are suggestive of Jacksonian epilepsy probably due to a head injury he received 2 years ago. I would suggest a complete neurological examination.

(3) The applicant has some arthritis, deformans of hands and feet, especially of hands, with thickened joints and contractures of fingers. Also has Dupretons contractures of palmar fascia of both hands. On the back of right hand is an old scar due to a gunshot wound.

(4) Rhomberg positive but patient is very nervoud type, reflexes all hyperactive. However suggest a Wasserman being done.

Diag; - (1) Myocarditis.
(2) Arthritis deformans
(3) Jacksonian epilepsy

KUNDER, John Age 62 Lighthouse keeper

Complaint of attacks of dizziness, several periods of unconsciousness with paraesthesias in the skin upon completion of attacks.

Neurological Examination: shows increased deep reflexes, unsteadiness to Romberg- (falls to left), crossed adductor reflex to right, slight fanning of smaller toes to Babinski on right. Slight ataxia on heel to knee test. Colloidal Gold 1123443210. Spinal Wasserman negative. Blood Wasserman negative.

There seems to be some slowing of mentality, speeck is slow and patient states that his memory is not good.

Opinion: The neurological findings may depend entirely upon cerebral circulatory changes. The arterio-sclerosis with small vessels lending support to this view.

1. For several years the Keeper of the Farallon Light Station has held life saving drills quarterly in which all keepers at the station and all radio operators on the island have been required to join.

2. The station has been furnished a beach apparatus which has been supplemented by a number of heavy ash carrying poles which permits transporting the life saving equipment to rocky portions of the island which are not accessible to the cart used with the apparatus. The care of this apparatus and the work incident to the drills has required considerable extra time and work by the keeper who is already charged with very exacting duties in the care of his station. In view of the zeal and efficiency with which Mr. Kunder has carried out these drills and the interest which he has voluntarily taken in the work, it is recommended that a letter of commendation be addressed to him.

CERTIFICATE OF MEDICAL EXAMINATION, DISABILITY RETIREMENT

(Act of March 4, 1925)

6/27/31
(Date)

NAME OF CLAIMANT John Kunder DESIGNATION Keeper in Charge

Here give a complete personal description, together with permanent marks and scars other than those described below in physical examination: Rather obese, stocky built individual, anxious expression on face which is flushed & phlebotonic looking. No cyanosis of lips & fingernails. No edema of ankles.

Height 5' 6½" Weight 162 pounds. Complexion ruddy

Color of eyes brown Color of hair iron grey

Claimant makes the following statement in regard to the origin, nature, and extent of the alleged disability: Shortness of breath, difficult breathing at night so that he can hardly sleep, pain over heart, slight swelling of ankles at times - 2 yrs.
Stiffness & contractures of hands & feet so that he can't write for 2 wks at a time - 7 mos duration. Convulsions 4-6 mos. mental confusion & nervousness following convulsions for 2-3 days.

Here describe fully nature of disability:
Patient gives history of cardiac decompensation and angina pectoris but I can find no physical signs to account for it. No murmurs. BP 130/85. Vessels are somewhat thickened. Fingers both hands contracted from arthritis (over)

Claimant describes the duties of his position as follows: Climb up light house 3 5-4 feet high twice a day. Keep all light-house records. Take care of all light-house property - dwellings, donkey-house, oil-house, boat-house, 2 dwellings, oil-house, one life-saving station, coal-shed, blacksmith shop - etc.

Born April 13, 1869

Is disability to perform such duty of a permanent character? yes

Is it indicated that applicant may recover from disability and be fit for restoration to active duty? no Do you recommend reexamination with this in view? no *

I 9 HEREBY CERTIFY that upon examination I 9 find the above-named claimant to be disabled for useful and efficient service by reason of the disability above described, which is not due to vicious habits, intemperance, or willful misconduct on his part.

Continuation of description of disability—

(1) As noted although no organic lesion can be found to indicate a cardiac lesion except an occasional extra systole yet according to patients history I think he undoubtedly has some myocarditis somewhat decompensated judging by his difficulty in breathing on slight exertion, moderate orthopnea, and swelling of ankles at times.

(2) I cannot account for the convulsions which are suggestive of Jacksonian epilepsy probably due to a head injury he received 2 yrs ago. I would suggest a complete neurological examination.

Urine - negative

(3) The applicant has some arthritis deformans of hands & feet, especially of hands, with thickened joints and contractures of fingers. Also has Dupuytren's contracture of palmar fascia of both hands. On the back of rt hand is an old scar due to a gunshot wound.

(4) Rhomberg positive but patient is very nervous type, reflexes all hyperactive. However suggest a Wasserman being done.

Diag — (1) Myocarditis (3) Jacksonian epilepsy
(2) Arthritis deformans

Complaint of attacks of dizziness, several periods of unconsciousness with paraesthesias in the skin upon completion of attacks.

Neurological Examination: shows increased deep reflexes, unsteadiness to Romberg- (falls to left), crossed adductor reflex to right, slight fanning of smaller toes to Babinski on right. Slight ataxia on heel to knee test. Colloidal gold 1123443210 Spinal Wasserman negative Blood Wasserman negative.

There seems to be some slowing of mentality, speech is slow and patient states that his memory is not good.

Opinion: The neurological findings may depend entirely upon cerebral circulatory changes. The arterio-sclerosis with small vessels lending support to this view.
