Plans and specs.
for standard towers.

Superintendent of Lighthouses,
Staten Island, New York.

1. You will find a letter inclosed, dated April 27, 1928, from the Superintendent of the 19th Lighthouse District, and its inclosure, a photograph, relating to a tower transferred to the 18th District by the 2d Superintendent.

2. It appears that the tower is the one which was formerly in service at Mayo Beach Light Station, Mass., and is from the plans of the tower formerly in use at Cold Spring Light Station, N. Y., which in turn may have been based on the plans for Great Beds Light Station, N. J.

3. If you have the detailed drawings or tracings from which the tower was made, the Bureau requests that you send two sets thereof to this office, and specifications also. The return of the photograph is requested.

J. S. CONWAY

Acting Commissioner of Lighthouses.

JTY:CFH

Office, Superintendent of Lighthouses,
Staten Island, N. Y., May 11, 1928.

Returned to Commissioner.

1. Enclosed are blueprints in duplicate of Drawing #7290 and this office is of the opinion that the light shown on this drawing is the same one referred to in Bureau's letter. The only drawing of this tower was an old paper drawing and a tracing was made of same so that the prints could be furnished to the Bureau.

2. It may be stated that towers of this type are now in use at Four Mile Point and Maxfield Point. Also there is one of this type at Isle La Motte.
