Superintendent of Lighthouses,

Sir:

I beg to inform your office that on 4th of November at 3.30 P.M. I left my station for home on Gwynns Island, when about a mile from beach I saw an object to North of me and made for it. Found it to be an airoplane disabled, being made to make repairs. I started to tow them in a harbor. Before I could succeed the wind broke down about North and blew so, we had to beach the airoplane. I then took the three occupants in my boat. Lieut. Davis, C.H. Palmer and Mr. Speake, and with some difficulty succeeded in getting them to Gwynns Island about 9 P.M., then to Hotel Powell, where they were cared for. Next day being unfit to return to Station, I assisted them in getting the machine of beach to Callis Wharf, Gwynns Island, Va. The three assert that I was instrumental in saving their lives and a $ 75,000. airoplane. When we landed on the Island that night we were all soaking wet and cold.

Very respectfully,

(SGD) John E. Morgan,

2nd Asst. Wolf Trap Lt.

Subject: Commendation, John E. Morgan, 2nd Asst. Keeper, Wolf Trap L.S.

Reference: His letter dated Nov. 6, attached hereto.

On November 4, Mr. John E. Morgan, Second Assistant Keeper at Wolf Trap Light Station, while leaving the Station for his home on Gwynns Island, noticed a disabled aeroplane with three occupants on board, and went to their assistance. A strong North wind arose and he was unable to tow them ashore, so he beached the aeroplane and took the occupants ashore in his boat. The next day Mr. Morgan helped get the aeroplane to Callis Wharf, Gwynns Island, Va. Further details in regard to this matter will be found in a letter from Mr. Morgan, dated November 6, copy of which is attached hereto.

In view of the above, it is recommended that a letter of commendation be sent to Mr. Morgan.

Answer to Question 25, P.C.B.Form No.14

This employee is principal keeper in charge of a lighthouse built on submarine foundation. The structure consists of a 2 story house about 30 feet square on a foundation inter-braced iron piles, and surmounted by a glazed lantern containing Fresnal lens for display or light which may be either kerosene wick lamp or incandescent oil vapor apparatus. The house is also equipped with fog bell operated by clockwork. Communication with shore is by motor launch kept at station. Each of two keepers is allowed 8 days ashore per month and when both are at station, they divide watches of light and fog signal. The principal keeper is in responsible charge and his first duty is to see that the light never fails to burn from sunset to sunrise nor the fog signal to sound when needed. All apparatus is required to be kept in perfect condition of cleanliness and operating efficiently and the entire structure thoroughly clean and well painted inside and outside, and minor repairs made as needed within his capacity. Owing to exposed location and salt water, proper preservation of metal work, especially iron foundations, requires constant attention. He is also required to keep all station records including journal watch book, fog-signal record and property accounts.

The attendance upon minor lights grouped under care of this keeper's station is an important duty and requires skill and considerable risk in operating motor launch oftentimes under stormy conditions, and knowledge of the care and operation of acetylene gas apparatus.

28. TO THE EMPLOYEE: Describe in detail the work you do. Put each distinct duty, task, or process in a separate paragraph. Explain first those that require most of your time. Explain occasional duties last. To the column at the left opposite each paragraph enter the approximate percentage of your time devoted to the work described in that paragraph.
