Sir:-

Referring to the Bureau's letter of Dec. 19, 1910, relative to Hillsboro Bay Buoy, 13A, it is respectfully stated that on making inquiries into the matter of the moving of this buoy from its true position on the evening of Nov. 25, 1910, it is believed from the replies received that the buoy in question was inadvertently displaced by some vessel during the intense darkness and fog that prevailed at the time in that locality.

The agents of steamship companies and the pilots of that region have been requested to inform this Office when they note any accidents to aids to navigation in the future.

For the Inspector, and in his absence.

Very respectfully,
