This office is pleased to note from your letter of July 9, 1937, and attached clipping from the Bangor Daily News the assistance rendered by Additional Keeper Philip A. Davis on July 4 in towing a disabled 28-foot power launch to Bar Harbor, and the assistance rendered on the same day by Keeper Jaruel B. Pinkham in company with Mr. Homer Wilkinson in towing a 42-foot launch with a fishing party of eleven aboard to the mooring at Egg Rock Light Station and upon the return to the station of Mr. Davis towing same to Bar Harbor. It is also pleased to note the assistance rendered by Keeper Pinkham on July 5 in aiding a sail boat which was in danger of going ashore on Porcupine Island.

It is desired to commend both keepers for their prompt and efficacious action in these instances and to advise that a report of the assistance has been forwarded to the Commissioner of Lighthouses at Washington, D. C., to be made a part of the official records.

Sir:

At 9 A. M. July 4th we answered the distress signal of a 28ft. power launch owned by Dudley Sargent of Bar Harbor. He had lost his anchor and in trying to get back to Bar Harbor broke his oar. Mr. Davis towed him to Bar Harbor with the station boat.

At 12 noon a 42 ft. launch on July 4th with a fishing party of eleven sent up distress signals in the vicinity of Egg Rock whistling buoy. I tried to get the Coast Guard for aid but their line was dead. With the aid of Homer Wilkinson in a twenty foot launch we got the fishing party and boat to the mooring. Wilkinson's boat only had a one cylinder engine and he had hard work towing to the mooring. On return of Mr. Davis from Bar Harbor with the station boat he towed the 42 ft. launch and party into Bar Harbor. The 42 ft. launch was owned and operated by Vincent Davis, Lamoine, Me.

July 5th at 2 P. M. an amateur got in trouble with 17 ft. sail boat and was going ashore on Porcupine Island and I went to his aid and towed him to Bar Harbor.

LIGHTHOUSE TENDER PLAYS THE PART OF GOOD SAMARITAN

(Special to The Bangor Daily News)

Bar Harbor, July 4--The Egg Rock lighthouse tender played the part of rescuer on two occasions today.

In the morning, while proceeding to Bar Harbor, it picked up a disabled 18-foot motor launch, owned by Dudley Sargent of Bar Harbor, and towed it back to town.

In the afternoon, the tender returned to the vicinity of the lighthouse, where a 42-foot motor boat was disabled. It was owned by Vincent Davis of Lamoine.

Sir:

Referring to your letter of May 10, the little girl was about 11 years old. She was alone and fishing from a float at the side of the Maine Central Wharf. While attempting to get into a boat she fell overboard where the water was about fifteen feet deep. She grasped the edge of the float and began calling for help. There was one man on the wharf and I was on the float so I got to her first and pulled her to safety.

Jaruel B. Pinkham, Keeper, Egg Rock Light Station, Me.
Superintendent's letter of caution, December 17, 1935.

In accordance with provisions of Article 440 of "Regulations, 1927," the Bureau is advised that no further complaints or notices have been received that the light at this station has not shown its proper characteristic. The light was in good order and on time at last inspection of station. Further check-up will be made at next inspection and report and recommendation submitted to Bureau if it appears that further disciplinary action is warranted.

Jarued B Pinkham, Keeper, Egg Rock LH., Me.

Referring to your reply of December 10th to my letter of the 7th regarding your light showing fixed at 5.00 a.m. on December 5th, you are advised that your explanation for the failure of the light is not satisfactory. If the apparatus stopped as a result of oil hardening on the ball bearings, as you claim, it was due to negligence on your part in not using a lighter grade oil during cold weather. If, as you claim, you were working in the tower when the tender passed, the fact would have been evident to observers in the pilot house, who report that they saw no one in the tower.

You should see that your apparatus is in good condition at all times; that is what you are there for, and what will be required of you in the future.

It is a serious thing to exhibit a false light along the coast which might lead to disaster. It is hoped that there will not be any further complaints, and you are cautioned to see that there are none for which you are responsible as I will be compelled to take drastic action if there should be.

Sir:

In reply to letter December 7, 1935.

I was on watch from 12 mid. to 6 a.m. on Dec. 5, 1935. The light stopped on account of the oil hardening on the ball bearings, also in clock works. The cold weather was the cause of it. I had to wash the ball bearings with kerosene and use lighter oil, also kerosene on the clock. I got the light going as soon as possible. The light is working all right at date. I was working in tower on the light when the tender was going east; that is I took it to be the tender on Dec. 5, 1935.

CHIEF CLERK

November 10, 1931

Jaruel B Pinkham, Keeper, Egg Rock Lt., Me.

1931 NOV 16 AM 10 59

1. The Assistant Superintendent reports that upon inspection of your station, during your absence on October 21, 1931, the following conditions were found:

2. "Upon inspecting the fog signal I found that the flywheel on the left hand engine was loose on the crankshaft and keepers could not fasten wheel on so engine could be run. Upon questioning the Assistant Keeper he stated that the wheel had been loose for some time. No report has been made of this to the office. The Assistant Keeper was then ordered to start the right hand engine, and after 20 minutes of hard effort, he got it running, but engine could not be brought up to proper speed, nor would it pump air pressure to more than 3 lbs., nor blow the second blast of the double blast, as per characteristic of this fog signal. The bell machine for the mechanical fog bell was found in poor condition, so covered with paint and rust that it would not operate. The light was found in good order and exactly on time, and quarters, fog signal house, oil house, boathouse and outhouses were in good order and fairly clean, but the fog signals, especially the fog bell, have been very much neglected by keepers."

3. From the above quoted report it is evident that both you and the assistant keeper are not giving the fog signal apparatus at your station the care and attention required. Regarding your failure to report the fact that the flywheel on left hand engine was loose and could not be repaired by you and the assistant keeper, your attention is directed to Article 25 of "Instructions to Employees, 1927", and you are cautioned that any further failure on your part to report at once by special letter any damage to or irregularity in working of illuminating or fog signal apparatus, as required by that article and by Article 185, will result in summary disciplinary action.

4. With regard to the auxiliary mechanical bell fog signal apparatus, your attention is directed to Article 193 of "Instructions," (particularly last sentence of first paragraph, requiring operation of this auxiliary fog signal at least 15 minutes each week), and to Article 196 (requiring that all parts of the apparatus be kept well oiled and free from dust, dirt and rust), and you are cautioned that any future failure to observe strictly the requirements of these articles will be severely dealt with.

5. You should read carefully and observe the provisions of the entire Part III of "Instructions," (pages 71 and 72), and require the assistant to do likewise.

Mrs. Clara Pinkham
9 Nichols Street
Haverhill, Mass.

My dear Mrs. Pinkham:

Receipt is acknowledged of your letter of 22 December, 1943 advising Headquarters of the death of your husband, Jarual B. Pinkham, Keeper, former Lighthouse Service now U. S. Coast Guard, Retired, on 31 December, 1942.

At the time of death there was due the estate of your husband retired pay in the amount of $43.36. This retired pay ceases at death and there is no law providing for the continuance of payment of any part to dependents. The forms necessary to effect settlement of this final retired pay are herewith inclosed.

If there will be no legal representative to administer the estate, the next of kin or the person who paid, or will pay the funeral and burial expenses should execute the inclosed Form No. 1055, claim for final pay, in the presence of two witnesses and a notary public, taking care to answer all questions as checked by pencil mark. If a representative is appointed a copy of the Court Order showing the appointment should be attached to Form No. 1055. If the funeral expenses have been paid, a bill receipted by the undertaker who conducted the services should be forwarded. Otherwise, the undertaker should sign the inclosed waiver form. This information is necessary to support the claim for the final retired pay.

When the inclosed forms have been completed, please return them to Coast Guard Headquarters, Washington, D. C.

By direction of the Commandant.

Very truly yours,

Incls.

Mr. Jaruel B. Pinkham, Keeper
Mr. Philip A. Davis, Additional Keeper
Egg Rock Light Station, Maine

This office is pleased to note from your letter of July 9, 1937, and attached clipping from the Bangor Daily News the assistance rendered by Additional Keeper Philip A. Davis on July 4 in towing a disabled 28-foot power launch to Bar Harbor, and the assistance rendered on the same day by Keeper Jaruel B. Pinkham in company with Mr. Homer Wilkinson in towing a 42-foot launch with a fishing party of eleven aboard to the mooring at Egg Rock Light Station and upon the return to the station of Mr. Davis towing same to Bar Harbor. It is also pleased to note the assistance rendered by Keeper Pinkham on July 5 in aiding a sail boat which was in danger of going ashore on Porcupine Island.

It is desired to commend both keepers for their prompt and efficacious action in these instances and to advise that a report of the assistance has been forwarded to the Commissioner of Lighthouses at Washington, D. C., to be made a part of the official records.

Sir:

At 9 A. M. July 4th we answered the distress signal of a 28 ft. power launch owned by Dudley Sargent of Bar Harbor. He had lost his anchor and in trying to get back to Bar Harbor broke his oar. Mr. Davis towed him to Bar Harbor with the station boat.

At 12 noon a 42 ft. launch on July 4th with a fishing party of eleven sent up distress signals in the vicinity of Egg Rock whistling buoy. I tried to get the Coast Guard for aid but their line was dead. With the aid of Homer Wilkinson in a twenty foot launch we got the fishing party and boat to the mooring. Wilkinson's boat only had a one cylinder engine and he had hard work towing to the mooring. On return of Mr. Davis from Bar Harbor with the station boat he towed the 42 ft. launch and party into Bar Harbor. The 42 ft. launch was owned and operated by Vincent Davis, Lamoine, Me.

July 5th at 2 P. M. an amateur got in trouble with 17 ft. sail boat and was going ashore on Porcupine Island and I went to his aid and towed him to Bar Harbor.

Bar Harbor, July 4--The Egg Rock lighthouse tender played the part of rescuer on two occasions today.

In the morning, while proceeding to Bar Harbor, it picked up a disabled 18-foot motor launch, owned by Dudley Sargent of Bar Harbor, and towed it back to town.

In the afternoon, the tender returned to the vicinity of the lighthouse, where a 42-foot motor boat was disabled. It was owned by Vincent Davis of Lamoine.

Referring to your letter of May 10, the little girl was about 11 years old. She was alone and fishing from a float at the side of the Maine Central Wharf. While attempting to get into a boat she fell overboard where the water was about fifteen feet deep. She grasped the edge of the float and began calling for help. There was one man on the wharf and I was on the float so I got to her first and pulled her to safety.

Referring to your reply of December 10th to my letter of the 7th regarding your light showing fixed at 5.00 a.m. on December 5th, you are advised that your explanation for the failure of the light is not satisfactory. If the apparatus stopped as a result of oil hardening on the ball bearings, as you claim, it was due to negligence on your part in not using a lighter grade oil during cold weather. If, as you claim, you were working in the tower when the tender passed, the fact would have been evident to observers in the pilot house, who report that they saw no one in the tower.

You should see that your apparatus is in good condition at all times; that is what you are there for, and what will be required of you in the future.

It is a serious thing to exhibit a false light along the coast which might lead to disaster. It is hoped that there will not be any further complaints, and you are cautioned to see that there are none for which you are responsible as I will be compelled to take drastic action if there should be.

In reply to letter December 7, 1935.

I was on watch from 12 mid. to 6 a.m. on Dec. 5, 1935. The light stopped on account of the oil hardening on the ball bearings, also in clock works. The cold weather was the cause of it. I had to wash the ball bearings with kerosene and use lighter oil, also kerosene on the clock. I got the light going as soon as possible. The light is working all right at date. I was working in tower on the light when the tender was going east; that is I took it to be the tender on Dec. 5, 1935.

9. Remarks.—Give further information as may be necessary relative to negative answers to questions 3 to 6. Mention should be made of all important facts concerning the station.

Station only in fair condition. Carpenter left station June 15 and their clutter not completely cleaned up. Reservation more or less cluttered up with wood here and there - old plaster from ceiling still lays outside dwelling under window easterly side dwelling - Repaired breakwater - new iron work not red leaded, old iron work rusty and not scaled and painted and wood work not white washed. Outside of dwelling loose and thick paint all over house should be scraped off and properly primed and painted. Roof conductor rusted through - Keeper told to repair - Iron latch on signal house door and hinges on oilhouse badly corroded with rust and no attempt to clean and paint. Keepers started to shingle privy and have neglected to finish in last month. This probably a surprize inspection as keeper said didn't expect to be inspected until fall.

Recommend consolidate fuel houses - 2 at station - only one needed, both keepers to use. Station not in satisfactory condition.

Recommend Bureau address letter to Keeper to get busy and get station in 1st-class condition and to do no outside work until all station work is done. Asst. Keeper found building a boat for himself. Appears upkeep of station is being neglected and they are not performing duty.

Jaruel B Pinkham, Keeper, Egg Rock LH., Me.

1. The Assistant Superintendent reports that upon inspection of your station, during your absence on October 21, 1931, the following conditions were found:

2. "Upon inspecting the fog signal I found that the flywheel on the left hand engine was loose on the crankshaft and keepers could not fasten wheel on so engine could be run. Upon questioning the Assistant Keeper he stated that the wheel had been loose for some time. No report has been made of this to the office. The Assistant Keeper was then ordered to start the right hand engine, and after 20 minutes of hard effort, he got it running, but engine could not be brought up to proper speed, nor would it pump air pressure to more than 3 lbs., nor blow the second blast of the double blast, as per characteristic of this fog signal. The bell machine for the mechanical fog bell was found in poor condition, so covered with paint and rust that it would not operate. The light was found in good order and exactly on time, and quarters, fog signal house, oil house, boathouse and outhouses were in good order and fairly clean, but the fog signals, especially the fog bell, have been very much neglected by keepers."

3. From the above quoted report it is evident that both you and the assistant keeper are not giving the fog signal apparatus at your station the care and attention required. Regarding your failure to report the fact that the flywheel on left hand engine was loose and could not be repaired by you and the assistant keeper, your attention is directed to Article 25 of "Instructions to Employees, 1927", and you are cautioned that any further failure on your part to report at once by special letter any damage to or irregularity in working of illuminating or fog signal apparatus, as required by that article and by Article 185, will result in summary disciplinary action.

4. With regard to the auxiliary mechanical bell fog signal apparatus, your attention is directed to Article 193 of "Instructions," (particularly last sentence of first paragraph, requiring operation of this auxiliary fog signal at least 15 minutes each week), and to Article 196 (requiring that all parts of the apparatus be kept well oiled and free from dust, dirt and rust), and you are cautioned that any future failure to observe strictly the requirements of these articles will be severely dealt with.

5. You should read carefully and observe the provisions of the entire Part III of "Instructions," (pages 71 and 72), and require the assistant to do likewise.

August 4, 1927.

Chief of the Lighthouse Service,
Department of the Interior,
Washington, D. C.

Sir:

On August 3rd, about 4:30 in the afternoon, I was out fishing in a rough sea, by the Egg Rock Lighthouse when the Skipper of the motor boat "Nina", on which we were, noticed that the anchor was dragging. He attempted to start the motor but the motor would not go and we finally drifted on the rocks just off the main ledge of the Island. A boy helper and myself jumped on one of the rocks, and the Skipper was carried off a few yards farther when he was spilled out and swam to a ledge. The Assistant Keeper of the Lighthouse, Mr. J. B. Pinkham, saw our distress signals and came to our rescue in a dory. As you doubtless know, the handling of a dory in a boiling sea in the neighborhood of rocks and ledges, requires not only skill and judgment, but courage. It was also attended by considerable personal risk. This, Mr. Pinkham realized fully, as he remarked after he had taken two of us off one rock and was manoevering to get around a ledge to reach the Skipper, "If we hit that ledge we will all go to hell."

Mr. Pinkham gave no thought to his personal danger, but only to getting us off those rocks. Had we been compelled to stay on them, we would have suffered severely from exposure, as it would have been several hours before the tide would have retreated sufficiently to permit us to make the main ledge of the island.

We were taken to the Lighthouse where Capt. A. B. Hamor, head keeper, made us comfortable until we were able to get a boat to take us back to Bar Harbor.

I am writing you as I know that you will be pleased to hear of an act of courage and devotion to duty, of one of your men.

Very truly yours,

J. E. Zanetti,
Associate Professor of Chemistry,
Columbia University.

	(Yes or no)

RULES FOR SALARY ADVANCEMENTS.-Subject to conditions established by law and Executive order:

A. An employee whose efficiency rating is "Excellent" or "Very Good" is eligible for salary advancements to the highest rate of compensation in the grade.

B. An employee whose efficiency rating is "Good" is eligible for salary advancement up to and including the middle rate of compensation in the grade (C.S.C.Dept'l Cir. 302).

RULES FOR SALARY REDUCTIONS, DEMOTIONS, OR DISMISSALS.-The following rules are prescribed for the demotion of an employee to a lower grade position, reduction in salary, or both, or dismissal from the service as a result of an efficiency rating (C.S.C.Dept'l Cir. 302):

A. The rate of compensation of an employee whose efficiency rating is "Fair" shall be reduced one salary step if his rate of compensation is above the middle rate. If the rate of compensation is equal to or below such middle salary rate, it shall not be subject to reduction on that account.

B. An employee whose efficiency rating is "Unsatisfactory" shall not be permitted to remain in his position. If he is serving his probationary period, he shall be separated from the service under the rules prescribed for such cases. If he has completed his probationary period, he shall be assigned to a position more nearly commensurate with his ability, in a lower classification grade, and his rate of compensation shall not be in excess of the middle rate for such grade, or if no suitable vacancy is available in a lower classification grade, he shall be separated from the service for inefficiency.

C. No employee who has completed his probationary service shall be demoted to a lower grade position, reduced in salary, or dismissed from the service on the basis of an efficiency rating covering a period of less than 90 calendar days.

INSPECTION OF RATINGS BY EMPLOYEES:

A. A list of all ratings on Standard Form 52 shall be open to inspection by any employee of the department, independent establishment, or other agency under such conditions as to time and place as the head of such organization may prescribe (C.S.C.Dept'l Cir. 302).

B. Every employee has the right to see his rating form, Standard Form 51.

This office is pleased to note from your letter of July 9, 1937, and attached clipping from the Bangor Daily News the assistance rendered by Additional Keeper Philip A. Davis on July 4 in towing a disabled 28-foot power launch to Bar Harbor, and the assistance rendered on the same day by Keeper Jarued B. Pinkham in company with Mr. Homer Wilkinson in towing a 42-foot launch with a fishing party of eleven aboard to the mooring at Egg Rock Light Station and upon the return to the station of Mr. Davis towing same to Bar Harbor. It is also pleased to note the assistance rendered by Keeper Pinkham on July 5 in aiding a sail boat which was in danger of going ashore on Porcupine Island.

It is desired to commend both keepers for their prompt and efficacious action in these instances and to advise that a report of the assistance has been forwarded to the Commissioner of Lighthouses at Washington, D. C., to be made a part of the official records.

Jaruel B Pinkham, Keeper, Egg Rock LH., Me.

Referring to your reply of December 10th to my letter of the 7th regarding your light showing fixed at 5.00 a.m. on December 5th, you are advised that your explanation for the failure of the light is not satisfactory. If the apparatus stopped as a result of oil hardening on the ball bearings, as you claim, it was due to negligence on your part in not using a lighter grade oil during cold weather. If, as you claim, you were working in the tower when the tender passed, the fact would have been evident to observers in the pilot house, who report that they saw no one in the tower.

You should see that your apparatus is in good condition at all times; that is what you are there for, and what will be required of you in the future.

It is a serious thing to exhibit a false light along the coast which might lead to disaster. It is hoped that there will not be any further complaints, and you are cautioned to see that there are none for which you are responsible as I will be compelled to take drastic action if there should be.

Commissioner of Lighthouses:

SUBJECT:--Jaruel B. Pinkham--Report on conduct and capabilities.

1. Pursuant to instructions contained in Art. 440, "Regulations, 1927", and with reference to Superintendent's letter of caution dated November 10, 1931, the Bureau is advised that the conduct and capacity of the above-named employee have been satisfactory since date of caution.

2. Fog signal and auxiliary fog bell apparatus were found to be in good condition upon an inspection of the station on April 29, 1932.

SHERMAN,
Superintendent.

GFL:CP

November 10, 1931

Jarued B Pinkham, Keeper, Egg Rock LH., Me.

1. The Assistant Superintendent reports that upon inspection of your station, during your absence on October 21, 1931., the following conditions were found:

2. "Upon inspecting the fog signal I found that the flywheel on the left hand engine was loose on the crankshaft and keepers could not fasten wheel on so engine could be run. Upon questioning the Assistant Keeper he stated that the wheel had been loose for some time. No report has been made of this to the office. The Assistant Keeper was then ordered to start the right hand engine, and after 20 minutes of hard effort, he got it running, but engine could not be brought up to proper speed, nor would it pump air pressure to more than 3 lbs., nor blow the second blast of the double blast, as per characteristic of this fog signal. The bell machine for the mechanical fog bell was found in poor condition, so covered with paint and rust that it would not operate. The light was found in good order and exactly on time, and quarters, fog signal house, oil house, boathouse and outhouses were in good order and fairly clean, but the fog signals, especially the fog bell, have been very much neglected by keepers."

3. From the above quoted report it is evident that both you and the assistant keeper are not giving the fog signal apparatus at your station the care and attention required. Regarding your failure to report the fact that the flywheel on left hand engine was loose and could not be repaired by you and the assistant keeper, your attention is directed to Article 25 of "Instructions to Employees, 1927", and you are cautioned that any further failure on your part to report at once by special letter any damage to or irregularity in working of illuminating or fog signal apparatus, as required by that article and by Article 185, will result in summary disciplinary action.

4. With regard to the auxiliary mechanical bell fog signal apparatus, your attention is directed to Article 193 of "Instructions," (particularly last sentence of first paragraph, requiring operation of this auxiliary fog signal at least 15 minutes each week), and to Article 196 (requiring that all parts of the apparatus be kept well oiled and free from dust, dirt and rust), and you are cautioned that any future failure to observe strictly the requirements of these articles will be severely dealt with.

5. You should read carefully and observe the provisions of the entire Part III of "Instructions," (pages 71 and 72), and require the assistant to do likewise.

August 4, 1927.

Chief of the Lighthouse Service,
Department of the Interior,
Washington, D. C.

Sir:

On August 3rd, about 4:30 in the afternoon, I was out fishing in a rough sea, by the Egg Rock Lighthouse when the Skipper of the motor boat "Nina", on which we were, noticed that the anchor was dragging. He attempted to start the motor but the motor would not go and we finally drifted on the rocks just off the main ledge of the Island. A boy helper and myself jumped on one of the rocks, and the Skipper was carried off a few yards farther when he was spilled out and swam to a ledge. The Assistant Keeper of the Lighthouse, Mr. J. B. Pinkham, saw our distress signals and came to our rescue in a dory. As you doubtless know, the handling of a dory in a boiling sea in the neighborhood of rocks and ledges, requires not only skill and judgment, but courage. It was also attended by considerable personal risk. This, Mr. Pinkham realized fully, as he remarked after he had taken two of us off one rock and was manoevering to get around a ledge to reach the Skipper, "If we hit that lege we will all go to hell."

Mr. Pinkham gave no thought to his personal danger, but only togetting us off those rocks. Had we been compelled to stay on them, we would have suffered severely from exposure, as it would have been several hours before the tide would have retreated sufficiently to permit us to make the main ledge of the island.

We were taken to the Lighthouse where Capt. A. B. Hamor, head keeper, made us comfortable until we were able to get a boat to take us back to Bar Harbor.

I am writing you as I know that you will be pleased to hear of an act of courage and devotion to duty, of one of your men.

Very truly yours,
